Optimal Physical Activity across the Lifespan for People of All Abilities Ronald F. Zernicke ,David Arthur Hart, Humans evolved to be mobile within the boundary conditions of Earth and many biological and physiologic systems depend on mechanical loading to maintain integrity during growth and maturation during skeletal maturity and during the aging process These systems subscribe to the use it or lose it principle and thus require continual use to maintain integrity Given that premise considerable basic and clinical research efforts have been directed at optimizing the effectiveness and positive impact of exercise on sports performance and the well being of those with intact systems However those with disabilities or compromised abilities also benefit from exercise protocols and there exists a need to focus attention on these populations as well Given the myriad of biological and physiological systems that benefit from exercise and mechanical loading there is a need for all humans of varying abilities to not only maintain the integrity of their health but to attempt to optimize it recognizing that optimizing each person s health across the stages of the life cycle may require different exercise protocols dependent on stage of life sex genetics and other individualized variables For those with physical disabilities embracing and maintaining such exercise protocols may be challenging but expanded research translation of findings and integration of the outcomes into everyday life to enhance the health and well being of this significant population are needed going forward

Prompt Engineering Guide for High School Students - Pioneers of the Seventeenth Century C

Mahoney,2023-10-13 As an educator with over 20 years of classroom experience I m excited to offer this comprehensive guide to help teachers introduce the crucial skill of prompt engineering to students Prompt engineering involves crafting detailed specific prompts to direct chatbots like ChatGPT to generate customized high quality outputs Over the past six months I ve created over a thousand prompts myself refining the process of prompting to optimize chatbot responses This guide contains six types of potential chatbot outputs for students to explore poems stories conversations essays descriptions and lists of facts For each output I ve included examples based on fascinating figures from 17th century history such as astronomer Galileo Galilei philosopher Rene Descartes and poet Anne Bradstreet By exposing students to a diverse range of historical individuals they gain insights into the importance of tailoring prompts For instance a prompt for Galileo might involve his astronomical discoveries while one for Descartes would highlight his philosophical introspections The specificity is key I walk teachers through crafting prompts using elements like genre additional characters actions settings timing problems that arise tones and length This methodical approach allows students to incrementally add complexity to their prompts witnessing firsthand how each component shapes the final product My hope is that by engaging students in this highly customizable prompt engineering process they will grasp the direct relationship between prompt quality and AI output This foundational skill once instilled will equip them to thrive in a future undoubtedly intertwined with AI I m thrilled to offer

my expertise to fellow educators seeking to augment their instruction with this forward thinking skill Together we can empower students to direct technology optimally by mastering the art of prompt engineering
