Tasso,G.

Guida,2014-06-28 Expert Systems are so far the most promising achievement of artificial intelligence research Decision making planning design control supervision and diagnosis are areas where they are showing great potential However the establishment of expert system technology and its actual industrial impact are still limited by the lack of a sound general and reliable design and construction methodology This book has a dual purpose to offer concrete guidelines and tools to the designers of expert systems and to promote basic and applied research on methodologies and tools It is a coordinated collection of papers from researchers in the USA and Europe examining important and emerging topics methodological advances and practical experience obtained in specific applications Each paper includes a survey introduction and a comprehensive bibliography is provided *Program Evaluation* Susan P. Giancola,2025-04-14 This text aims to build evaluation capacity by increasing knowledge about evaluation and improving skills to conduct evaluations The book s embedded approach uses program theory to understand relationships between activities and objectives logic modeling to

represent the program's theory and an evaluation matrix to structure the evaluation within the program. The approach is systematic and focused on continuous improvement. The Second Edition adds topics suggested by users of the book, incorporates content that the author has added to her own classes and covers emerging areas in evaluation since the publication of the first edition such as artificial intelligence and equity in evaluation. A companion website at <http://edge.sagepub.com> Giancola2e includes a number of instructor resources including editable PowerPoint slides and assignments.

PC AI, 1995 **Innovations and Technologies in Science/STEM Education: Opportunities, Challenges and Sustainable Practices** Wang-Kin Chiu, Hon-Ming Lam, Morris Siu Yung Jong, 2024-04-01 In our digital era harnessing innovations and emerging technologies to support teaching and learning has been an important research area in the field of education around the world. In science/STEM education, technologies can be leveraged to present and visualize scientific theories and concepts effectively while the development of pedagogic innovations usually requires collective interdisciplinary research efforts. In addition, emerging technologies can better support teachers to assess students' learning performance in STEM subjects and offer students viable virtual environments to facilitate laboratory-based learning, thereby contributing to sustainable development in both K-12 and higher education.
