[Money God Temples in Taiwan](#)

Fabian Graham, 2025-12-22. This book traces the history and development of Taiwan's new money god tradition, where, by borrowing a small sum of blessed fortune money and returning it with interest within a year, a temple's deity may intervene in the recipient's life, bringing them unearned good luck and good fortune. Comprising an in-depth ethnography based on a decade of research, the book explores Taiwan's money god tradition, revealing its ritual culture and underlying beliefs thoroughly analyzed from sociological, comparative, historical, geographic, Taoist, Buddhist, metaphysical, and philosophical contexts. Drawing on Taoist and Buddhist cosmology, Chinese afterlife beliefs, and a trust in the power of the gods to influence the material world, the narrative explores the subjective nature of luck and fate, of human desires, choices, and decisions, and of individuals' subjective understandings of what the universe contains. These factors all contribute to the book's final question: which, through an exploration of human

deity interactions investigates whether Jacques Derrida's true unreciprocal gift exists on a transcendent level amid the religious exchanges within Taiwan's money god tradition. This will be a valuable resource for students and scholars of Chinese religion and Taiwanese culture as well as those with an interest in East Asian philosophy and religion. 2084 and the AI Revolution, Updated and Expanded Edition John C. Lennox, 2024-11-26 Will technology change what it means to be human? You don't have to be a computer scientist to have discerning conversations about artificial intelligence and technology. We all wonder where we're headed. Even now, technological innovations and machine learning have a daily impact on our lives, and many of us see good reasons to dread the future. Are we doomed to the surveillance society imagined in George Orwell's 1984? Mathematician and philosopher John Lennox believes that there are credible responses to the daunting questions that AI poses, and he shows that Christianity has some very serious, sensible, evidence-based things to say about the nature of our quest for superintelligence. This newly updated and expanded edition of 2084 will introduce you to a kaleidoscope of ideas: Key recent developments in technological enhancement, bioengineering, and in particular artificial intelligence; Consideration of the nature of AI systems with insights from neuroscience; The way AI is changing how we communicate; implications for medicine, manufacturing, and the military; its use in advertising and automobiles and education; and the future of work; How data is used today for surveillance, thought control; The rise of virtual reality and the metaverse; The transhumanist agenda and longtermism; The agreements and disagreements that scientists and experts have about the future of AI; The urgent need for regulation and control in light of the development of large language transformers like CHATGPT; Key insights from Scripture about the nature of human beings, the soul, our moral sense, our future, and what separates us from machines. In straight-forward, accessible language, you will get a better understanding of the current capacity of AI, its potential benefits and dangers, the facts and the fiction, as well as possible future implications. Since the questions posed by AI are daunting as they might affect most of us, they demand answers. 2084 and the AI Revolution, Updated and Expanded Edition has been written to challenge and ignite the curiosity of all readers. Whatever your worldview, Lennox provides clear information and credible answers that will bring you real hope for the future of humanity. English-Medium Instruction in Higher Education in Hong Kong Jack Pun, Wenyun Jia, 2025-12-11 This book explores issues of teaching science, technology, engineering, and math (STEM) through the medium of English in the context of higher education in Hong Kong. It analyses policy issues and language challenges faced by university students and pedagogical strategies for the professional development of English-Medium of Instruction (EMI) teachers. Hong Kong as a focus case is valuable because nearly 60% of government-funded university programmes are STEM or science-related, while over 90% of the student population speaks Chinese as a first language but also speak and write English due to local language policies and Hong Kong's colonial history, making it a useful site for EMI research. By providing an evidence-based, pedagogically focused analysis of teacher and student classroom practices and their perceptions, this book sheds light on ways to improve the quality of instructional

practices and effective scaffolding in different types of EMI classrooms in Hong Kong and in similar contexts around the world The examples of the EMI lessons with annotated notes which showcase good practices of EMI teaching will be particularly valuable to university EMI co ordinators content subject and English teachers and instructors doing EMI professional development courses *ECIAIR 2019 European Conference on the Impact of Artificial Intelligence and Robotics* Dr Paul Griffiths ,Dr. Mitt Nowshade Kabir ,2019-10-31 **AI Magazine** ,1986 **Computer Language** ,1990

Knowledge-based Systems for General Reference Work John V. Richardson,1995 By focusing on knowledge based systems technology the primary purpose and goal of this book is to improve the quality of reference service rendered in libraries Within reference service this book examines question answering a complex and difficult task For those interested in the theoretical aspects of reference work they have to look no further than the first chapter In addition the book features theoretical chapters on modelling the reference transaction a chapter on the logic of ready reference work and a chapter on the appropriate criteria to apply in selecting an expert system shell Several practical chapters focus on what KBS work has already been done in the field and evaluate nearly fifty expert system development shells so that readers can select the most appropriate shell for their domain The subtitle of the book is applications problems and progress in regard to expert systems in reference work Applications are covered most clearly in chapter 8 which reviews the more than extant prototypes Chapter 3 covers what is feasible chapter 4 models the reference transaction and chapter 7 covers interface issues so that future applications can be more successful Problems are covered throughout the book starting with chapter 1 which discusses the traditional emphasis on reference sources It argues that the field needs to shift toward procedural knowledge related to work in reference departments The chapter on expert system feasibility reveals that there are alternative ways of conceptualizing the intellectual work of an expert and of course chapter 9 directly points out limitations in extant systems Encouraging words occur in chapter 1 about the shift to a balanced or complete paradigm for doing reference work Similarly the chapter on modelling is optimistic in that reference work can be modelled and systems implemented which act like human experts The final chapter tries to avoid the technological optimism inherent in many books on expert systems by identifying the near term factors which will influence the development of expert systems Key Features Historical background presenting the field s paradigmatic thinking Decision trees for basic formats of reference material Flowchart modelling the reference transaction Reviews of more than fifty extant KBS in general reference environments Evaluative criteria on more than forty expert system shells **Four Battlegrounds** Paul Scharre,2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club s Must Read Books An invaluable primer to arguably the most important driver of change for our future P W Singer author of *Burn In* An award winning defense expert tells the story of today s great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI

superpowers China the United States and Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing technology and dominate the future Four Battlegrounds argues that four key elements define this struggle data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined Advanced computer chips are the essence of computing power control over chip supply chains grants leverage over rivals Talent is about people which country attracts the best researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military Scharre s account surges with futuristic technology He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits China s National Team of leading AI companies to show the chilling synergy between China s government private sector and surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology Engaging and direct Four Battlegrounds offers a vivid picture of how AI is transforming warfare global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order *The Software Encyclopedia* ,1986 **Japanese Technical Abstracts** ,1986
