Creations David H Cropley, 2025-03-25 This edited book explores creative products i.e. Creations as part of the seven C's of creativity framework. Through nine chapters leading scholars in the field explore five different domains: education, crime, terrorism, music, science, and engineering, addressing the nature of the creations in each given domain and the criteria by which creations in that domain are judged. Drawing together key underpinning concepts from the science of creativity, the book delves into the history of creativity research applied to products to then explore new concepts that are impacting on research, especially the role of artificial intelligence in supporting the development and assessment of creative products.

This book covers topics such as ethics, law, pedagogy, and language and linguistics and is a useful resource for translators and interpreters, business owners, policymakers, government officials, educators, academicians, researchers, and scientists.

Humanising Language Education in the Generative Artificial Intelligence Age Jérémie Bouchard, 2026-01-26 Examining the presence and influence of GenAI in the contexts of English for Academic Purposes (EAP) and written composition within university-level English as a foreign language (EFL) programmes, this book asserts a humanist view of language education informed by critical realism and the social realist philosophy of education. Jérémie Bouchard looks at the GenAI language education interaction through explicit philosophical engagement with the aim of strengthening a critical and emancipatory approach to EAP written composition and language education. By highlighting technological determinism and relating it to broader neoliberalist mechanisms, the book provides new insights into the social, political, economic, cultural, and historical contexts within which the use of GenAI technologies by language teachers and learners can be understood. *Humanising Language Education in the Generative Artificial Intelligence Age* will appeal to students and scholars of linguistics, education, and sociology, as well as organisations devoted to understanding the evolution
