Zernicke ,David Arthur Hart, Humans evolved to be mobile within the boundary

conditions of Earth and many biological and physiologic systems depend on mechanical loading to maintain integrity during growth and maturation during skeletal maturity and during the aging process. These systems subscribe to the use it or lose it principle and thus require continual use to maintain integrity. Given that premise, considerable basic and clinical research efforts have been directed at optimizing the effectiveness and positive impact of exercise on sports performance and the well being of those with intact systems. However, those with disabilities or compromised abilities also benefit from exercise protocols, and there exists a need to focus attention on these populations as well. Given the myriad of biological and physiological systems that benefit from exercise and mechanical loading, there is a need for all humans of varying abilities to not only maintain the integrity of their health but to attempt to optimize it, recognizing that optimizing each person's health across the stages of the life cycle may require different exercise protocols dependent on stage of life, sex, genetics, and other individualized variables. For those with physical disabilities, embracing and maintaining such exercise protocols may be challenging, but expanded research, translation of findings, and integration of the outcomes into everyday life to enhance the health and well being of this significant population are needed going forward.

Augmenting Human Resource Management with Artificial Intelligence Aizhan Tursunbayeva, 2024-12-23. The potential of Artificial Intelligence (AI) to reshape Human Resource Management (HRM) practices is profound, but it also presents challenges that require careful consideration, particularly in terms of ethics, inclusivity, and sustainability. However, knowledge about whether and how this transformation is actually occurring remains limited. This book aims to provide a theoretically informed and empirically grounded examination of AI's role in shaping the future of HRM and work. The book explores HRM technologies using a configurational approach which views HRM practices as a blend of operational, relational, and transformational elements. It consistently addresses the dual perspectives on AI: its transformative potential and the concerns surrounding its disruptive impact on the future of work and management. In doing so, the book draws on ongoing original research, including an analysis of vendors' value propositions and insights from scholars and experts. Real-life applications of AI in HRM are also thoroughly covered, offering insights into algorithmic management, AI-driven relational HRM configurations, and AI-augmented HRM. The book dedicates significant attention to the ethical implications of AI and how they can be addressed through Responsible AI principles. Ultimately, it establishes a framework for future research and practice, serving as a crucial reference for scholars, practitioners, and policymakers.

Generative AI in Education Ilaria Torre, Diego Zapata-Rivera, Chien-Sing Lee, Antonio Sarasa-Cabezuelo, Ioana Ghergulescu, Paul Libbrecht, 2024-12-24. In the field of education, there is a growing interest in the use of Generative Artificial Intelligence to reshape the educational landscape. Led by our esteemed Associate Editors Dr. Zapata-Rivera, Prof. Torre, and Review Editors Profs. Lee, Sarasa-Cabezuelo, Libbrecht, Dr. Ghergulescu, this editorial initiative aims to investigate the transformative potential of Generative AI in various aspects of education. By leveraging machine learning models, these intelligent systems extract useful insights from vast amounts of data, making them capable of

delivering highly individualized content They can analyze a learner's proficiency level, learning style and pace and then tailor the study material accordingly Whether a learner prefers visual aids, textual content or interactive modules Generative AI can adapt its content generation strategies to meet distinct preferences and learners' needs This ensures an elevated engagement level and enhanced comprehension highlighting its potential to transform traditional teaching methodologies
