MAKE MONEY BLOGGING Jim Selter, 2020-12-25 It is a no laughing matter to come up with a blog that will push a large number of readers and help you earn a lot of money That s why I wanted to bring this guide together to help you make the choices that will maximize the odds of creating a popular blog that people would continue to visit over and over again Hopefully this guide will give you some hints some tips and help you make your blog not only good and read well but also get all the necessary readers followers contacts pundits and likely detractors and ultimately help you make a lot of money This guide will teach you how to monetize your blog and catch your share of traffic which in turn will help you make some money from your writing It will guide you through the stages of setting up your blog monetizing it and even driving traffic in measures that are easy to follow If you re new to blogging then I suggest you start working your way through chapter one but if you ve already set up your blog and just want to build on what you ve already developed then pick and choose dip in and out the most valuable bits for you You ve already read more about blogging vlogging tweeting podcasting and micro blogging however you may have thought that being a blogger someone who posts a blog vlogger

someone who hosts produces a video based blog and or podcaster someone who creates an audio podcast is too time consuming too expensive and wouldn't help you in some way Well the time has come for you to talk about this again and again In the past it was important to land a job as a writer for a big newspaper or magazine or become the host of a radio or television program if you wanted to reach a mass audience Even if you succeeded in winning one of these jobs you always had to stick to your bosses stringent editorial standards and uphold a high degree of journalistic integrity However due to blogging anyone from anywhere has the ability to share their views suggestions information viewpoints and or experience with a potentially large audience around the globe and the expense of doing this is basically at a lower cost The main idea that you need to take away from this book before we get started is sure blogging is easy to do If you build it though they won't actually come here Even if you build and post the most amazing groundbreaking artistic imaginative fun insightful and interactive blog in internet history it won't generate an audience if you don't invest the time and resources you need to market your blog too After all thousands of new blogs are generated every day and the blogosphere already has millions upon millions of popular and not so successful blogs out there If you want your blog to be popular you'll need to be creative and innovative directly target your original content to your intended audience and most importantly encourage your blog to build and maintain the following However if you take the right path to get reasonable goals into this project then the possibilities are completely limitless Before we really start learning everything about blogging it's important to understand that a blog can take on many types these days It can be created using text alone or you can blend text with images video audio computer graphics and other multimedia content to communicate your core message or information to the intended public Similarly a blog need not be a stand alone body For eg it can be released as part of a website or Facebook page or it can be linked directly to everything else that you do online
