Generative AI for Academics Mark Carrigan, 2024-12-11 This is your indispensable guide to navigating the rise of generative AI as an academic It thoughtfully explores rapidly evolving AI capabilities reshaping higher education examining challenges and ethical dilemmas across the sector It provides useful strategies for using generative AI in your scholarly work while upholding professional standards This practical guidance addresses four core areas of academic work Thinking How to use generative AI to augment individual and collaborative scholarly thinking that can assist in developing novel ideas and advancing impactful projects Collaborating Explore how generative AI can be used as a research assistant coordinating teams and enhancing scholarly cooperation Communicating Cautioning against over reliance examine how generative AI can relieve communication burdens while maintaining professionalism and etiquette Engaging thoughtful and practical frameworks are offered for using these developments to support online engagement without sacrificing scholarly principles Mark Carrigan is a digital sociologist author and Lecturer in Education at the University of Manchester

Designing Instruction with Generative AI Brent A. Anders, 2025-09-16 Designing Instruction with Generative AI offers a novel set of tools and strategies for leveraging generative AI to create engaging and personalized learning experiences While instructional designers are a tremendous asset to higher education not all colleges or universities have the robust staff needed to support all instructors on staff or large student populations Drawing on a wealth of research professional experience and strategic insights this book equips new and seasoned teaching faculty and trainers with step by step directions on how freely accessible artificial intelligence software can assist with all aspects of the course creation and instruction process and cater to the needs of diverse learners Each chapter offers forward

thinking and empirically validated ways to help faculty create and improve instructional materials course design and learning environments while supporting their digital literacies Rather than introduce AI as a means of outsourcing subject area expertise critical thinking or cognitive processes the author instead emphasizes its potential to build on traditionally honed knowledge and foundational instructional design practices From optimizing course alignment and accessibility practices to fostering active learning motivation and engagement educators will find new solutions to common teaching and learning challenges with greater efficiency in time and capacity The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Learning to Flourish in the Age of AI Stephen M. Kosslyn, 2024-12-11 This timely book affirms that humans can flourish in the Age of AI by relying on their distinctive strengths and explores the skills and knowledge that are required to interact effectively efficiently and responsibly with AIs both today and in the future In Part I this book develops the Cognitive Amplifier Loop which allows humans to use AI to build on their cognitive and emotional strengths and manage their limitations Kosslyn discusses ways to employ this loop to offload tasks to AI and to utilize it to train us effectively and efficiently as well as how to use it to both learn and engage in critical thinking creative problem solving and manage cognitive and emotional constraints Part II establishes how to draw on the Cognitive Amplifier Loop to help us improve our human relationships addressing emotional intelligence effective communication leadership followership and collaboration skills Finally Part III builds on previous chapters to consider how to interact with AIs to help each of us learn and grow Throughout the book Kosslyn provides practical strategies and AI assisted exercises to help readers develop these essential skills and knowledge Kosslyn argues that by cultivating distinctively human capabilities we can not only coexist with AI but flourish in an AI infused world This book is a must read for anyone involved with AI education or Learning and Development in industry It will also appeal to anyone studying thinking and decision making AI and psychology and the use of technology in the classroom

Bioinspired Strategic Design Daniel J. Finkenstadt, Tojin T. Eapen, 2024-07-08 Organizations are commonly thrust into hostile operating environments where they are required to make strategic decisions that involve significant and costly tradeoffs Such hostile environments may be endemic such as an economic recession or idiosyncratic such as a predatory action by an adversary Many features of such hostile environments parallel those of living organisms that also demonstrate fine tuned strategies to improve their survivability under adverse conditions How can organizations use these bioinspired strategies to survive and even potentially innovate This book shows that the same three capabilities essential for the survival of living organisms in harsh environments efficiency resilience and prominence are also critical for organizations in their process of navigating through their own hostile environments Throughout the book the authors provide organizational executives with a systematic framework for thinking about strategic decision making in a hostile environment leaning on analysis of real world cases to draw out ontologies and methods for guiding their teams through disruptions change management innovation and process improvements In the first part organizations are provided with a systematic approach to analyzing three survivability influences forces resources and observers and their interrelationships While all three influences are active across all organisms and organizations the exact nature of their interrelationship and the significance of each influence are unique to every organism or organization The framework helps organizations nail down the specific features of their operating

environment that can help or hinder survivability by analyzing the three influences Organizations can respond to external influences by developing three pronged capabilities efficiency resilience and prominence ERP that respond to the three survivability influences Organizations often struggle with identifying the appropriate strategies to apply under different conditions Fortunately nature provides several mechanisms that can be analogically applied to guide business strategies The book contains many illustrations and examples of strategic principles observed among living organisms that can help an organization develop ERP capability Finally the book introduces seven strategic design heuristics Combination Elimination Separation Segmentation Replication Dynamics and Maximization observed in a living system that can be flexibly utilized to generate ideas to achieve strategic ends
