Teaching Political Science and International Relations for Early Career Instructors Michael P. A. Murphy, Misbah Hyder, 2024-12-01 In doctoral programs graduate students are often encouraged to prioritize their research over teaching This leads many early career scholars to identify primarily with the role of researcher This edited collection introduces the term early career instructor ECI as a novel concept in understanding the experience of graduate students postdoctoral fellows early tenure track contingent faculty and other scholars early in their teaching careers Including a diverse array of authors this volume brings together essays on ECI experiences in different institutional and national contexts as well as reflections on current practices

for ECI support and mentorship At a higher level this volume is also a call to action to recognize the importance of teaching in the early career stage Chatgpt and Other Generative AI Tools Jochen Kuhn, Stefan Küchemann, Knut Neumann, Martina Rau, 2025-02-17 In the past ten years applications of generative artificial intelligence GAI have found rapidly growing use in medicine science and daily life Large language models LLMs opened up new avenues in particular for education LLMs have been used to create interactive educational content for students stimulate their curiosity generate code explanations and develop assessment questions Additionally LLMs been applied for language practice anxiety alleviation and feedback provision In higher education LLMs have shown potential for assisting in medical exam preparation and clinical decision making In school education LLMs can help teachers with automated evaluation of student responses and respective adaptive feedback More recently LLM based applications such as chatGPT have been used to generate teaching materials or assessment tasks across different subjects The fields understanding of the effects of the use of LLM based applications in classroom teaching however is still in its infancy GAI tools may help solving a range of tasks in education in particular with respect to teachers and students and teachers efforts to generate content However it is critical that teachers and students do not overly rely on GAI generated solutions but instead critically assess each solution Students should furthermore not use GAI tools to avoid investing relevant mental effort to create mental models or more broadly build up competencies

Impact of Technology on Human Behaviors in Medical Professions Education Muhammad Azeem Ashraf, Jinbo He, Samson Maekele Tsegay, 2025-02-20 Human behaviors are essential in understanding how individuals engage in medical science academic activities Healthcare systems across the globe have witnessed a significant shift in recent years by integrating technology in innovating new methods and practices to improve educational practices Therefore pedagogical practices in medical sciences are expected to be consistent with the current developments so that medical students are prepared with the necessary skills when entering workplaces In addition the excessive use of technology has created severe concerns in the academic community that needs further investigation Thus it is crucial to know how teachers and students in medical sciences engage themselves in challenging behaviors particularly in academic activities This Research Topic aims to call for papers examining the influence of technology on human behavior in medical education We invite researchers practitioners teachers and students in all medical science disciplines to submit their research papers encompassing Quantitative studies Qualitative studies Empirical Case studies Mixed Method studies Experimental Research and Review studies This Research Topic welcomes articles about but not only limited to the following topics 1 impact of technology on human behavior in medical professions teaching 2 impact of technology on human behavior in medical professions training and learning 3 effect of different social and psychological factors on healthy unhealthy use of technology in medical sciences Collecting Social Media in Museums Craig Middleton, Caroline Wilson-Barnao, 2025-12-08 Collecting Social Media in Museums draws attention to the importance of collecting social media as museum objects and explores the role of rapid response and born digital

collecting in documenting social history as it happens Drawing on a range of case studies and facilitated conversations with museum professionals and technology experts the book discusses different approaches to incorporating creator content from social media into museum practice It highlights the need to bridge the gap between traditional museum practices that focus only on material aspects and what the authors argue is increasingly fundamental to human experience and identity formation social media and digital cultural artefacts Providing readers with the critical tools necessary for a rethinking of museum collecting practices in the digital age the book highlights different projects that have navigated ethical legal and copyright concerns for institutions The book culminates with recommendations relating to the implementation of social media collecting strategies ultimately calling for the museum to be more responsive to safeguarding the content that is generated online for future generations Collecting Social Media in Museums provides museum professionals around the world with valuable tools that will empower them to change their practices and respond to social media in real time before it s too late to act Scholars and students engaged in the study of museums media and digital humanities will also find much to interest them within the pages of this book

Adaptive Artificial Intelligence P. Pavan Kumar,Grandhi Suresh Kumar,Ajay Kumar Jena,Sandeep Kumar Panda,S. Balamurugan,2025-09-30 Master the next frontier of technology with this book which provides an in depth guide to adaptive artificial intelligence and its ability to create flexible self governed systems in dynamic industries Adaptive artificial intelligence represents a significant advancement in the development of AI systems particularly within various industries that require robust flexible and responsive technologies Unlike traditional AI which operates based on pre defined models and static data adaptive AI is designed to learn and evolve in real time making it particularly valuable in dynamic and unpredictable environments This capability is increasingly important in disciplines such as autonomous systems healthcare finance and industrial automation where the ability to adapt to new information and changing conditions is crucial In industry development adaptive AI drives innovation by enabling systems that can continuously improve their performance and decision making processes without the need for constant human intervention This leads to more efficient operations reduced downtime and enhanced outcomes across sectors As industries increasingly rely on AI for critical functions the adaptive capability of these systems becomes a cornerstone for achieving higher levels of automation reliability and intelligence in technological solutions Readers will find the book Introduces the emerging concept of adaptive artificial intelligence Explores the many applications of adaptive artificial intelligence across various industries Provides comprehensive coverage of reinforcement learning for different domains Audience Research scholars IT professionals engineering students network administrators artificial intelligence and deep learning experts and government research agencies looking to innovate with the power of artificial intelligence
