Chinese Policies Toward Limiting Nuclear Weapons Amos Yoder, 1980 **Restructuring the Chinese City** Laurence J.C. Ma, Fulong Wu, 2004-08-02 A sea of change has occurred in China since the 1978 economic reforms Bringing together the work of leading scholars specializing in urban China this book examines what has happened to the Chinese city undergoing multiple transformations during the reform era with an emphasis on new processes of urban formation and the consequent reconstituted urban spaces With arguments against the convergence thesis that sees cities everywhere becoming more Western in form and suggestions that the Chinese city is best seen as a multiplex city *Restructuring the Chinese City* is an indispensable text for Chinese specialists urban scholars and advanced students in urban geography urban planning and China studies *The Chinese Armed Forces in the 21st Century*, 1999 The debate about China and Taiwan is re emerging in the United States The accidental bombing of the Chinese Embassy in Belgrade of course put on the front burner the way that nationalistic fervor has grown in China at least some of it as a result of manipulation by the Communist Party President Lee Teng hui s comments about state to state relations between Taiwan and the mainland raised the temperature of relations across the strait and among the three concerned parties China the United States and Taiwan China threatened China postured and China ran political campaigns against the United States and Lee But the questions of military capability security policy and intent are rarely treated seriously This book is a serious look at the armed forces of China and how they will evolve Seeking the Common Dreams between the Worlds Yan Wang, Yali Zhao, 2013-06-01 This is the first book that probes the lived experiences of Chinese immigrant faculty in North American higher education institutions their struggles challenges successes etc It explores how their past experiences in China have shaped who they are now what they do and how they pursue their teaching research and service as well as the reality of their everyday life that inevitably intertwines with their present and past diverse cultural backgrounds and unique experiences Different from previous books that explore immigrant minority faculty defined ambiguously and broadly and from the theoretical framework of ethnic relations this book has a particular focus on mainland Chinese immigrant faculty which offers a richer and deeper understanding of their cross culture experiences through autoethnographic research and by multiple lenses Through authors vivid portray of the ebbs and flows of their life in the academe readers will gain an enjoyable and holistic knowledge of the cultural political linguistic scholarly and personal issues contemporary Chinese immigrant faculty encounter as they cross the border of multiple worlds All contributors to this book had the experience of being the first generation Chinese immigrants and they either are currently teaching or used to teach in North American higher education institutions who were born brought up educated in Mainland China and came to North America for graduate degrees from early 1980s to 2000 Explaining Chinese Democratization Shaohua Hu, 2000-01-30 Hu seeks to explain China s failure to establish a democratic system He demonstrates both continuity and change in China s democratization process Modern China regards power and wealth as

primary goals and treats a strong state as a major means to these ends Such a preference puts democracy on a back burner Employing a theoretical framework which consists of five factors historical legacies local forces the world system socialist values and economic development Hu shows that while all of these factors were at work in all eras each assumes a special significance in a particular period Traditional China before the 1911 Revolution attempted to adjust itself to a new Western dominated world In the Republican era the control of local forces topped the political agenda Nationalist China sought to survive and develop in the world system while Maoist China set for itself the task of building a socialist state And of course economic development has been the priority of the Deng era As Hu shows these five factors have had determining impacts on the long struggle for democracy in China

Chinese Civil-Military Relations Nan Li, 2010-04-05 This new book addresses three key issues What has changed in Chinese civil military relations What can account for changes And what are the implications for Chinese security policy and strategic behaviour It tackles these questions by sharply assessing civil military dynamics in elite politics such dynamics in national security and arms control policy relations between commanders and political commissars relations between the PLA and society civil military dynamics regarding defence economics and logistics and such dynamics regarding dual use technologies and defence industry These analyses build into the central theme that the emphasis of Chinese civil military relations is shifting from politics to military tasks This is an extremely important new development by a nation many predict to become a super power in the twenty first century This is therefore essential reading for all students and scholars of strategic and security studies Chinese studies and international relations

The Great Wall and the Empty Fortress Andrew J. Nathan, Robert S. Ross, 1998 Many see China and the United States on the path to confrontation The Chinese leadership violates human rights norms It maintains a harsh rule in Tibet spars aggressively with Taiwan and is clamping down on Hong Kong A rising power with enormous assets China increasingly considers American interests an obstacle to its own But the authors argue the United States is the least of China's problems Despite its sheer size economic vitality and drive to upgrade its military forces China remains a vulnerable power crowded on all sides by powerful rivals and potential foes As it has throughout its history China faces immense security challenges and their sources are at and within China's own borders China's foreign policy is calibrated to defend its territorial integrity against antagonists who are numerous near and strong The authors trace the implications of this central point for China's relations with the United States and the rest of the world
