Learn Fortune Telling by Cleromancy Muzamal Naveed, 2020-05-22 The Book of Change is the most ancient and most profound of the Chinese classics venerated for millennia as an oracle of fortune a guide to success and a dispensary of wisdom The ancestor of all Chinese philosophy it is the primary source for the pragmatic mysticism of the Tao Te Chin and the rational humanism of Confucius The Book of Change was originally composed over three thousand years ago by a king and his son in the tutelage of a Taoist sage Six centuries later the book was analyzed and annotated by Confucius the great scholar and educator The result of this work was the classic in the format known today a compendium of advice on the causes behind the rise and fall of kingdoms and careers The earliest function of the core symbols of The Book of Change is traditionally said to have been as a system of notation a tool for grouping associations and defining relations symbolically This system evolved into a language of logic for describing the courses of actions and events The sources of The Book of Change lore are thus to be found in the origins of writing itself in the attempt to depict phenomena and events in written symbols The structures of The Book of Change represent dynamic patterns of causal relations the total design of the book constitutes a symbolic language generating descriptions of relationships as they change over time The original recorded versions of The Book of Change would have been inscribed on strips of bamboo or wood which when arrayed for the purposes of consultation would not resemble a modern book in form or structure The internal order was maintained by the relationships among the principal symbols which by virtue of their complexity allowed several different systems of interrelation to coexist within the internal order of the abstract Book of Change
