 virtue Excavations in China since the 1970s have shed much light on the use and production of jade in neolithic and early  
 dynastic periods Excavated jade artefacts dating from the seventh to seventeenth centuries are rare so it is particularly  
 valuable that a number of specimens have been unearthed from tombs and pagoda foundations during the past two decades  
 thus allowing heirloom jades to be compared with these excavated examples and correctly dated This book is a timely  
 reassessment of what is known about Chinese jade which has been a central element of Chinese material culture for an  
 uninterrupted span of seven thousand years and will appeal to collectors and newcomers to the subject alike
