Chinese Space Program A Mystery Within A Maze:

The Chinese Space Program Joan Johnson-Freese, 1998 Analyzes the Chinese space program in the context of Chinese political economic and cultural parameters critical to realistic and pragmatic policy analysis Projections are offered concerning where China might be going in the future what policy actions the US might take to avoid a confrontational stance with China and how to encourage Beijing to build a more stable regime Includes a glossary Annotation copyrighted by Book News Inc Portland OR

Chinese Space Policy Roger Handberg, Zhen Li, 2006-11-29 This volume explains the beginnings and expansion of China's space program analyzing how China is now able to hold such ambitions and how the interaction between technology politics and economics has influenced the Chinese space program It opens by tracing out the earlier development of the space program and identifying the successes and problems that plagued this initial effort later focusing upon its development over the past decade and into the future As China is now able to reach into outer space with its machines and since 2003 with its humans the authors examine how this move from a non participant status to a state operating at the highest level of space activities has confirmed its potential place as the new economic and military superpower of the twenty first century They also demonstrate how recent successes mean that China is now confronted by an issue previously encountered by other space powers such as the United States and the former Soviet Union what is the value of the space program given its high costs and likelihood of dramatic failure Chinese Space Policy will be of great interest to students of space studies Chinese politics security studies and international relations in general

When China Goes to the Moon... Marco Aliberti, 2015-07-04 This book is about China's ambitions in its most complex and internationally visible space endeavor namely its human space exploration programme It provides a comprehensive reflection on China's strategic direction and objectives in space including in particular those set forth in its human spaceflight programme and analyses the key domestic and external factors affecting the country's presumed manned lunar ambitions The objective of the book is to disentangle the opportunities and challenges China's space ambitions are creating for other spacefaring nations and for Europe in particular It therefore includes an in depth analysis of possible European postures towards China in space exploration and seeks to stimulate a debate on future space strategies in the broader context of world politics

Orbital Debris Prevention and Mitigation Efforts among Major Space Actors Marc Carns, 2023-07-03 In the absence of formal treaty law orbital debris has grown exponentially in our most valuable orbital regions To address this problem many major spacefaring programs have implemented independent laws and policies meant to mitigate the release and overall threat of debris However these individual efforts have not translated into a cohesive international set of regulations to address the growing debris problem Fortunately there may exist unappreciated similarities among major international programs either in whole or part that once identified could lay the groundwork for the recognition of customary international law This book reviews a number of major programs in depth and seeks to answer if any commonality among them has likely established
