## **Chinese In Silicon Valley Globalization Social Networks And Ethnic Identity:**

The Chinese in Silicon Valley Bernard P. Wong, 2005-12-22 The Chinese in Silicon Valley examines the complex and ever growing role of Chinese American scientists and engineers in Silicon Valley Globalization brings workers from many different countries and cultures together impacting more than just their work environments The Chinese who settle in Silicon Valley must learn to prosper despite changes in cultural identity family life and often citizenship They learn how to utilize new social networks and make sense of a shifting ethnic identity The Chinese community in Silicon Valley is being developed with the advantages and constraints of many factors the new global economy technology the Chinese immigrants traditional culture and the American host culture Bernard Wong shows that the formation of Chinese American ethnic identity and community is a result of this globalization and transnationalism This informative book presents important new knowledge on the connection between Chinese ethnicity and highly skilled labor and entrepreneurship in Silicon Valley Secondary statistical data combined with primary personal interview data makes this a detailed and interesting study of globalization social networks and ethnic identity The Oxford Handbook of Asian American History David K. Yoo, Eiichiro

Azuma, 2016-01-04 After emerging from the tumult of social movements of the 1960s and 1970s the field of Asian American studies has enjoyed rapid and extraordinary growth Nonetheless many aspects of Asian American history still remain open to debate The Oxford Handbook of Asian American History offers the first comprehensive commentary on the state of the field simultaneously assessing where Asian American studies came from and what the future holds In this volume thirty leading scholars offer original essays on a wide range of topics The chapters trace Asian American history from the beginning of the migration flows toward the Pacific Islands and the American continent to Japanese American incarceration and Asian American participation in World War II from the experience of exclusion violence and racism to the social and political activism of the late twentieth century The authors explore many of the key aspects of the Asian American experience including politics economy intellectual life the arts education religion labor gender family urban development and legal history The Oxford Handbook of Asian American History demonstrates how the roots of Asian American history are linked to visions of a nation marked by justice and equity and to a deep effort to participate in a global project aimed at liberation The contributors to this volume attest to the ongoing importance of these ideals showing how the mass politics creative expressions and the imagination that emerged during the 1960s are still relevant today It is an unprecedentedly detailed portrait of Asian Americans and how they have helped change the face of the United States Diasporic Chinese Voluntary

Associations in Transition Ningning Chen, Emily Hertzman, Sylvia Ang, 2025-02-17 Recent studies of Chinese voluntary associations CVAs have attempted to highlight the theoretical significance of CVAs for understandings of community re making However the power dynamics inherent in community re making have rarely been expounded In recognition of this this book weaves together case studies across countries in the Asia Pacific to explore the complex power relations played out

in and through the transformation of CVAs Collectively CVAs are understood as ever changing heterogeneous ancestral communities composed of common ancestral ties be it origin locality surname religion or language Contributions to this book focus on CVAs in three ways 1 by foregrounding CVAs as sites of power relations through unpacking ethnic relations and gender hierarchies 2 by illuminating Chinese diaspora transnationalism beyond political economic perspectives and 3 by examining the contemporaneous transformation of ethnic Chinese communities in shifting times including amidst China's rise as a global power This book was originally published as a special issue of Ethnic and Racial Studies Routledge Handbook of the Chinese Diaspora Chee-Beng Tan, 2013-02-11 With around 40 million people worldwide the ethnic Chinese and the Chinese in diaspora form the largest diaspora in the world The economic reform of China which began in the late 1970s marked a huge phase of migration from China and the new migrants many of whom were well educated have had a major impact on the local societies and on China This is the first interdisciplinary Handbook to examine the Chinese diaspora and provides a comprehensive analysis of the processes and effects of Chinese migration under the headings of Population and distribution Mainland China and Taiwan's policies on the Chinese overseas Migration past and present Economic and political involvement Localization transnational networks and identity Education literature and media The Routledge Handbook of the Chinese Diaspora brings together a significant number of specialists from a number of diverse disciplines and covers the major areas of the study of Chinese overseas This Handbook is therefore an important and valuable reference work for students scholars and policy makers worldwide who wish to understand the global phenomena of Chinese migration transnational connections and their cultural and identity transformation The Chinese in Silicon Valley Bernard P. Wong, 2006 Bernard Wong examines the complex role of Chinese American scientists and engineers in their ever increasing role in Silicon Valley where those who settle there must learn how to prosper despite a changing cultural identity changes in family life and new citizenship China's Rise and the Chinese Overseas Bernard Wong, Chee-Beng TAN, 2017-07-28 Since the 1978 opening up of China and her active engagement in economic reformation and modernization China has become a truly global economic power These developments have consequently had an impact on ethnic Chinese people living across the world Traditionally the study of immigrant communities has focused on internal factors such as the leadership and social organization of the actors inside the communities This book however turns attention to the exogenous factors which have helped shape the lives of the Chinese diaspora In doing so it provides a valuable contribution to the recent literature which focuses on the effect of globalisation on the Chinese overseas Using a number of empirical case studies including the San Francisco Bay Canada South Africa and Hungary it provides an investigation into how China's contemporary position in the world has affected the identity of the various locales of the Chinese in different continents Whilst demonstrating the implications of China's rise on patterns of circular migration and transnational movements it also explores how the social and economic relations between Chinese communities and their host and ancestral countries have changed Ultimately it

highlights how China's rise has brought new economic opportunities and political clout for the Chinese overseas but at the same time has created new stereotypes and racial images by association. As an in-depth study of Chinese societies as well as current migration trends, this book will be useful for students of Chinese Studies, Ethnic Studies, Anthropology, and Sociology.

**Ethnoburb** Wei Li, 2008-12-09 Winner of the 2009 Book Award in Social Sciences Association for Asian American Studies. This innovative work provides a new model for the analysis of ethnic and racial settlement patterns in the United States and Canada. Ethnoburbs, suburban ethnic clusters of residential areas and business districts in large metropolitan areas, are multiracial, multiethnic, multicultural, multilingual, and often multinational communities in which one ethnic minority group has a significant concentration but does not necessarily constitute a majority. Wei Li documents the processes that have evolved with the spatial transformation of the Chinese American community of Los Angeles and that have converted the San Gabriel Valley into ethnoburbs in the latter half of the twentieth century, and she examines the opportunities and challenges that occurred as a result of these changes. Traditional ethnic and immigrant settlements customarily take the form of either ghettos or enclaves. Thus, the majority of scholarly publications and mass media covering the San Gabriel Valley has described it as a Chinatown located in Los Angeles suburbs. Li offers a completely different approach to understanding and analyzing this fascinating place. By conducting interviews with residents, a comparative spatial examination of census data, and other statistical sources, and fieldwork coupled with her own holistic view of the area, Li gives readers an effective and fine-tuned socio-spatial analysis of the evolution of a new type of racially defined place. The San Gabriel Valley tells a unique story, but its evolution also speaks to those experiencing a similar type of ethnic and racial conurbation. In sum, Li sheds light on processes that are shaping other present and future ethnically and racially diverse communities. The concept of the ethnoburb has redefined the way geographers and other scholars think about ethnic space, place, and process. This book will contribute significantly to both theoretical and empirical studies of immigration by presenting a more intensive and thorough take on arguments about spatial and social processes in urban and suburban America. *Journal of Chinese Overseas*, 2007

**Multicultural America** Ronald H. Bayor, 2011-07-22 This encyclopedia contains 50 thorough profiles of the most numerically significant immigrant groups now making their homes in the United States, telling the story of our newest immigrants and introducing them to their fellow Americans. One of the main reasons the United States has evolved so quickly and radically in the last 100 years is the large number of ethnically diverse immigrants that have become part of its population. People from every area of the world have come to America in an effort to realize their dreams of more opportunity and better lives, either for themselves or for their children. This book provides a fascinating picture of the lives of immigrants from 50 countries who have contributed substantially to the diversity of the United States, exploring all aspects of the immigrants' lives in the old world as well as the new. Each essay explains why these people have come to the United States, how they have adjusted to and integrated into American society, and what portends for their future. Accounts of the

experiences of the second generation and the effects of relations between the United States and the sending country round out these unusually rich and demographically detailed portraits      □□□□ ,2007      *American Journal of Chinese Studies* ,2007      **Global California** Abraham F.
