Chloroformist Christine Ball,2021-08-03 Operating with bare hands dressed in his street clothes he had taken those first steps that every training surgeon must take gripping the handle of a scalpel and making the first irrevocable cut into live human flesh For the surgeon training in the early 1840s these first surgical milestones were performed on a person who would recoil in terror and horror flinch pull away shake and scream and scream and scream Until 1846 surgery was performed without anaesthesia extraordinary operations carried out on conscious terrified patients Surgeons of that era were bold and courageous and saved many lives but anaesthesia changed everything With an unconscious patient the surgeon could take his time Surgery became slower more careful and more delicate And as anaesthesia removed the pain of surgery the medical world gave more attention to surgical infection heralding in the use of antiseptics and eventually aseptic surgery By 1881 the operating theatre was unrecognisable Much has been written about surgery in the nineteenth century but little has been said about the development of the relationship between surgeon and anaesthetist For anaesthesia to mature and allow further advances in surgery a professional relationship had to develop

between surgeons and anaesthetists Joseph Clover arguably did more than any other anaesthetist to develop that relationship In *The Chloroformist* Christine Ball tells the captivating story of an innovative hard working and deeply humane pioneer of modern patient care

Deliver Me from Pain Jacqueline H. Wolf, 2012-04-01 Despite today's historically low maternal and infant mortality rates in the United States labor continues to evoke fear among American women Rather than embrace the natural childbirth methods promoted in the 1970s most women welcome epidural anesthesia and even Cesarean deliveries In *Deliver Me from Pain* Jacqueline H Wolf asks how a treatment such as obstetric anesthesia even when it historically posed serious risk to mothers and newborns paradoxically came to assuage women's anxiety about birth Each chapter begins with the story of a birth dramatically illustrating the unique practices of the era being examined *Deliver Me from Pain* covers the development and use of anesthesia from ether and chloroform in the mid nineteenth century to amnesiacs barbiturates narcotics opioids tranquilizers saddle blocks spinals and gas during the mid twentieth century to epidural anesthesia today Labor pain is not merely a physiological response but a phenomenon that mothers and physicians perceive through a historical social and cultural lens Wolf examines these influences and argues that medical and lay views of labor pain and the concomitant acceptance of obstetric anesthesia have had a ripple effect creating the conditions for acceptance of other often unnecessary and sometimes risky obstetric treatments forceps the chemical induction and augmentation of labor episiotomy electronic fetal monitoring and Cesarean section As American women make decisions about anesthesia today *Deliver Me from Pain* offers them insight into how women made this choice in the past and why each generation of mothers has made dramatically different decisions

Drink Spiking and Predatory Drugging Pamela Donovan, 2016-07-04 This book analyses common perceptions about drink spiking a pervasive fear for many and sometimes a troubling reality Ideas about spiked drinks have shaped the way we think about drugs alcohol criminal law risk nightspots and socializing for over one hundred and fifty years since the rise of modern anaesthesia and synthetic pharma ubiquity The book offers a wide ranging look at the constantly shifting cultural and gender politics of psycho chemical treachery It provides rich case histories assesses evolving scientific knowledge and analyses the influence of social forces as disparate as Temperance and the acid enthusiasts of the 1960s Drawing on interdisciplinary research the book will be of great interest to upper level students and scholars of criminal law forensic science public health and social movements

Smoking Ears and Screaming Teeth Trevor Norton, 2012-09-27 A witty celebration of the great eccentrics who have performed dangerous scientific experiments on themselves for the benefit of humankind Many scientists have followed the advice of the great Victorian doctor Jack Haldane to never experiment on an animal if a man will do and never ask anyone to do anything you wouldn't do yourself He and his father inhaled poisonous gasses to test the efficacy of the prototype gas mask they had invented When breathing gasses under pressure he suffered the smoking ears and screaming teeth of the title The stories in Norton's new book are astonishing disturbing or absurd The zoologist Frank Buckland made a concentrated effort to widen the nation's diet by

personally testing everything that crossed his path from boiled elephant's trunk to slug soup. Some medics deliberately contracted deadly blood diseases in the hope of finding cures. Then there was the surgeon who was fired and subsequently won the Nobel Prize for thrusting a catheter into his own beating heart. *Anaesthesia and the Practice of Medicine: Historical Perspectives* Keith Sykes, John P Bunker, 2007-01-22. From the laughing gas parties and ether frolics of the 1830s to the scientific specialty of today, this book explains how advances in anaesthesia contributed to the development of safe and successful medical practice. Throughout this narrative, the authors provide fascinating insights into the personalities involved, from Wells, Morton, and Jackson, originators of general anesthesia, to Freud and Koller's legacy of cocaine addiction, and Queen Victoria's insistence during childbirth: "we are going to have this baby and we are going to have chloroform." *Cruel Deeds and Dreadful Calamities* Linda Stratmann, 2011. The Illustrated Police News is often dismissed as a crude publication which aimed to thrill the undiscerning reader with gruesome pictures. *Cruel Deeds and Calamities* sets out to correct that belief by demonstrating the diversity of its subject matter, examining its social and political agenda, and revealing the power and compassion in its images. The Illustrated Police News was a promoter of social change and a campaigner against the evils of cruelty, poverty, drink, and crime. It anticipated by many years the features of today's journalism: in the rapidity with which it provided pictures of current news events, its appeal to the emotions, and the involvement of its readers in the reporting process. This is the first book exclusively about the Illustrated Police News to reproduce the pictures as high quality images, provide a balanced account of its content, and cover the full period of its publication. There is substantial new research into how the paper was produced, the men who made it a success, and the stories behind the pictures. *Folly's quest* Folly, 1902.
