

CHOICE AND REPRESENTATION IN THE EUROPEAN UNION, edited by Roger Morgan and Michael Steed, The Federal Trust Series, London, 2003, 153pp, ISBN 0-901573-73-6, paperback, £19.95.

The fourth title in the Federal Trust series on the Future of European Parliamentary Democracy, *Choice and Representation in the European Union* brings together contributions by political scientists, two present and four former MEPs and the Brussels' representative of the Quaker Council for European Affairs. The two central questions addressed in the book are (p. 7) "how far do the electoral systems and the practices adopted by Europe's political parties offer an effective choice to the voters whom MEPs are elected to represent? Secondly, how far can the European Parliament carry out the functions of a 'normal' elected assembly - legislating, controlling the EU's budgetary and policy priorities, and influencing the choice of members of the Commission?"

Unfortunately the book fails to provide a satisfactory answer to either of the questions, leaving the reader rather confused about the role of the EP in modern Europe. This is particularly worrying given the persistent inaccuracies and misconceptions that still prevail about the Parliament. Instead of focusing on the differences between the EP and national parliaments, the best way to increase our understanding of the Parliament would be to emphasize that it operates indeed very much like a normal European continental legislature, with the only exception being that it does not have a real government accountable to it. The Parliament has a committee system that enables the MEPs to specialize and to amend EU legislation, cohesive party groups that build majorities by forming coalitions just like their counterparts in national parliaments, and MEPs who divide their time between Brussels/Strasbourg and constituencies.

Many of these problems could have been corrected through more careful editing. Now several of the contributions address the same themes and this leads to both inconsistency and a lot of unnecessary repetition. For example, is it really essential that most contributors repeat that the Parliament is nowadays quite a powerful actor in EU politics, after John Fitzmaurice has already explored the history of the EP in the second chapter of the book. Considering the range of authors, a better division of labour could have resulted in a genuinely interesting volume combining both academic views and practitioners' perspectives on the Parliament. Now several key aspects of 'choice and representation', such as Europarties and their EP groups, are either completely neglected or receive only sporadic attention.

Choice And Representation In The European Union:

Choice and Representation in EU Roger Morgan, 2005-12-23 Academic research on the European Parliament has not been gathered together critically or systematically either between disciplines or across national frontiers Media attention is spasmodic Turnout in European Parliamentary elections is low National perceptions of what the European Parliament is and should become vary In some traditions it would be important for a future European Executive to emerge from the Parliament for others such a development would fatally undermine the rights of member states Members of the European Parliament MEPs themselves appear to be frustrated despite the incremental growth of the formal competences of the Parliament over the years their status is lower than that of national MPs and the reputation of the Parliament as an institution uncertain Choice and Representation in the European Union analyses the strategies of the political parties and functionaries in the European Parliament and makes proposals for enhancing the turn out elections Legitimizing the European Union J. Mather, 2006-10-10 This is a study in EU legitimacy from the perspective of EU citizens Mather argues that legitimacy is empirical legitimacy only exists if people feel that it does and that the EU is a unique and dynamic institution hence legitimating factors are also evolutionary

Linguistic Diversity and European Democracy Anne Lise Kjær, Silvia Adamo, 2016-05-06 What role does linguistic diversity play in European democratic and legal processes Is it an obstacle to deliberative democracy and a hindrance to legal certainty or a cultural and economic asset and a prerequisite for the free movement of citizens This book examines the tensions and contradictions of European language laws and policy from a multi disciplinary perspective With contributions from leading researchers in EU law and legal theory political science sociology sociolinguistic and cognitive linguistics it combines mutually exclusive and competing perspectives of linguistic diversity The work will be a valuable resource for academics and researchers in the areas of European law legal theory and linguistics

British Politics and European Elections 2004 D. Butler, M. Westlake, 2005-04-18 A non election in terms of popular perception the 2004 European elections in the United Kingdom nevertheless provided a fascinating snapshot of the new far more fluid electoral trends that have been emerging since the end of the Thatcher era with Green Eurosceptical regional and single issue parties all jostling for electoral space with the bigger three Like its predecessors this book documents the background framework and party preparations recounts how the campaign unfolded analyses the results and explores the consequences of the elections in both the British and the European context

Reform Options for the EU Own Resources System Friedrich Heinemann, Philipp Mohl, Steffen Osterloh, 2008-06-10 The general review of the European Union's budget scheduled for the years 2008 and 2009 offers a unique opportunity for reflections Explicitly this review is without taboos so that also substantive changes can and should be debated Without doubt much better budgetary systems can be imagined compared to the status quo of the EU budget which is the outcome of a path dependent process and where many details are only understandable by taking account of the historical context of past decisions However even if much better systems could be designed in theory each reform suggestion in the end must pass the reality check of finding unanimous support from all 27 member countries This restriction heavily limits the universe of available reform options Faced with that difficulty the ZEW project team embarked on the adventure to think about possible reform options for the future EU own resource system This volume documents the conclusions At first sight our reform suggestion may appear to be of a rather piecemeal nature since we recommend a reform model with strong ties to the status quo Nevertheless we are convinced that our seemingly minor changes will set the budget on a path towards a more rational European budget which in the end will create leeway for financing European policies with a true European value added We gratefully acknowledge financial support from the German Federal Ministry of Finance in conducting this study

Corporate Lobbying in the European Union Marc Tenbücken, 2002 In the past the literature on EU lobbying has mostly focused on the activities of interest associations In contrast this book presents a systematic analysis of factors that influence the individual lobbying decisions of Multinational Companies and their use of certain routes of access to EU institutions In the first part it addresses the seemingly trivial question of why business has to focus even more intensively on its lobbying activities in the policy making processes of the European Union than on its lobbying efforts in national processes The second part then demonstrates theoretically that certain institutional and sectoral characteristics provide a good

explanatory framework for the decisions of Multinational Companies concerning the most promising lobbying strategy In emergency situations the lobbying activities of large companies will be retransferred from the supranational to the national level Eventually all alternative hypotheses that are presented throughout the book are tested empirically by a thorough examination of the case of the Directive on end of life vehicles Contents State Regulation and Corporate Interests Interest Representation at the European level The EU as a Multi Level Governance System European Public Policy Making Business Interest Associations Corporate Lobbying Directive on End of life vehicles

Choices for a Greener Future European Commission, 2002 Protecting our global environment is not a job for individual governments alone Effective action is needed to improve the quality of people's lives while at the same time safeguarding the nature and combating problems like climate change This calls for cooperation and partnership throughout society and at the international level The European Union has some 30 years experience of making policy and implementing action to conserve our natural heritage It has achieved significant results but much more remains to be done to ensure a cleaner healthier environment for European citizens their children and generations yet to come

European Integration and its Limits Daniel Finke, 2024-10-31 Since its legal foundation in 1993 the European Union has been challenged by three concurring developments Its decision making bodies groaned under burgeoning legislative activity and Eastern enlargement was expected to limit law making efficiency At the same time European citizens grew wary of EU politics and increasing integration This book explains how European governments handled these challenges and step by step agreed on significant reforms which led to the signing of the Lisbon Treaty in December 2007 Drawing on unique survey data European Integration and Its Limits provides a solid empirical analysis of the three most important intergovernmental conferences It shows how far voters and political parties have been able to influence European treaty reforms and it scrutinises the mechanisms underlying intergovernmental treaty negotiations in an ever growing Union The book discusses the domestic position formation process as well as the dynamics of intergovernmental bargaining Ultimately it explains European integration from Maastricht to Lisbon

Corporate Lobbying in the European Union Pieter Bouwen, 2001

Political Representation and Legitimacy in the European Union Hermann Schmitt, Jacques Thomassen, 1999-06-10 How severe a problem is what many call the democratic deficit of the European Union Despite a voluminous theoretical literature dealing with this question there is hardly any systematic empirical investigation of the effectiveness of the system of political representation in the EU and of the legitimacy beliefs of EU citizens that spring from it This volume elaborates a conceptual framework for the empirical analysis of the alleged democratic deficit Four dimensions of legitimacy beliefs are identified and analysed the European political community the scope of EU government the institutions and processes of EU government and EU policies Based upon large scale representative surveys among the mass publics and different strata of the political elite of the EU and its member states the book examines the conditions of political representation in the EU The results demonstrate by and large that legitimacy

beliefs of EU citizens are the more positive the less specific the object of identification and evaluations is and that the process of political representation works pretty well as long as issues other than European Union issues are concerned These findings are finally discussed in view of familiar strategies for institutional reform of the European Union

Public Choice and the Challenges of Democracy José Casas Pardo, Pedro Schwartz, 2007 New thinking in political economy *The British National Bibliography* Arthur James Wells, 2003

European Elections & Domestic Politics Wouter van der Brug, C. van der Eijk, 2007 This book analyzes how the behavior of voters parties and the mass media in European Parliament elections affects domestic politics and how in turn domestic politics affects those behaviors The contributors discuss election turnout and party choice the contract between the European Parliament and national elections the importance of citizens attitudes toward European integration the relationship between political parties domestic policies and their stances on European integration and the ways in which the mass media and election campaigns affect electoral outcomes On the basis of this information the authors present possible scenarios for future European elections and their relationship to the domestic politics of the EU member states The product of superb empirical research *European Elections and Domestic Politics* is based on a unique combination of data from voter surveys party manifestos and mass media reports across all members of the European Union This book will be essential for anyone interested in the future of the EU The definitive analysis of elections to the European Parliament by a first rate line up of scholars this study provides a masterclass on understanding the way that European elections national politics and the process of EU integration interact in complex and unexpected ways An invaluable study for those interested in elections and voting behavior European democracy comparative politics political communications and political parties Pippa Norris Director Democratic Governance Group United Nations Development Program and John f Kennedy School of Government Harvard University This book represents the best of the intersection on EU studies and the study of comparative European politics This sort of scholarship is the cornerstone of those interested in the domestic politics of European integration a work of the first order of quality Paul Taggart University of Sussex This is the most comprehensive book ever written on European Parliament elections For the first time the latest research on voter turnout voting behavior party manifestos election outcomes the effect of the elections on national politics and media coverage of European Parliament elections has been brought together in a single volume Simon Hix London School of Economics

Political Realignment Russell J. Dalton, 2018-10-18 The process of electoral change is accelerating in contemporary democracies and this book explains why The emergence of Green parties in the 1980s and recent far right parties Brexit and Trump s 2016 victory are parts of this overall process *Political Realignment* tracks the evolution of citizen and elite opinions on economic and cultural issues from the 1970s to the 2010s and the impact of these changes on electoral politics and public policy Citizen positions on these cleavages have realigned over time producing a similar realignment in the structure of the party systems to represent these demands Economic issues remain important now joined by divisions on

cultural issues as a backlash to modernization Assembling an unprecedented time series of empirical evidence this study explains the new forces of electoral change in both Europe and the United States The Politics of Information T. Blom, S. Vanhoonacker, 2015-12-27 This collection presents the results of a research agenda which examines how information plays a key role in policymaking As a very dynamic environment characterized by many different modes of information gathering and processing the EU forms a particularly interesting case to test the politics of information approach The European Union Peter Raymond Alexander Davies, 2003 Democracy in the European Union Christopher Lord, 1998 There has been much talk of the democratic deficit in the European Union but little understanding of the problems of constructing a transnational democracy This book seeks to remedy these defects by looking at democratic authorization and representation of Union power
