

Other challenges in establishing and maintaining traceability

- Lots of changes / Poorly tracked change / Out of date requirements specification
- Insufficient detail / Links are established too generically
- Project longevity / People leaving the project / New people joining the project / Insufficient knowledge transfer
- Unproductive decision making not involving the original sources of the requirements in further discussions and refinements
- Poor collaboration / Individual responsibility as opposed to team responsibility for requirements
- Poor reuse of requirements
- Poor tool choice / Inflexible tools / Tools not integrated or unable to maintain traceability for whole project lifecycle

The Role of Water and the Hydrological Cycle in Global Change Howard R. Oliver, Sylvia A. Oliver, 2013-06-29 Water is an extremely important factor in global environmental change Water influences the processes causing change The human and economic consequences of changes in the water system can be very significant The aim of this NATO Advanced Study Institute was to present a state of the art assessment of the role of water in global change ranging from a consideration of atmospheric processes to the social and political impacts of changes in water resources Many initiatives have recently been developed such as international conferences and research programmes in particular themes but there was still a need for information from these diverse activities to be brought together One of the aims of the ASI was to encourage cross fertilization between the various disciplines looking at water in the global system This book contains the expanded written versions of the lectures presented during the AS held in Italy in May June 1994 It falls into two basic parts The first twelve chapters cover the role of water in the climate system and climate modelling Various areas of the water balance including global budgets the effect of each element of the water balance on regional and global climates and procedures used to model hydrological processes at all scales are discussed Precipitation ice lake groundwater land surface and atmospheric considerations are included together with hydrological process linkage to climate models Ocean effects were not covered as they were considered to be outside the scope of this particular AS

Human Choice and Climate Change: The tools for policy analysis Steve Rayner, Elizabeth L. Malone, 1998
Exploring Environmental Change Using an Integrative Method Mark Lemon, 2003-09-02 This text draws upon complex systems thinking to introduce a policy related integrative method for diagnosing and managing environmental change This conveys how existing intellectual resources can be exploited to explore environmental decision issues without resorting to such devices as meta methods or meta disciplines

The Rules of Integration Mark Aspinwall, Gerald Schneider, 2001 This volume assesses the merits of institutionalist research on the European Union It offers a comprehensive review of the field and detailed analytical studies of diverse decision making processes and policies It engages the different strands in institutionalism in serious dialogue Proponents of rationalist historical and sociological tendencies present original research and criticize each other's contributions in constructive ways
