

The background of the book cover is a photograph of a vast, flat landscape covered in a dense carpet of small, colorful flowers, primarily in shades of purple and pink. The horizon is low, and the sky above is filled with soft, grey clouds, suggesting an overcast day. The overall mood is serene and natural, fitting for a book about biology and statistics.

## **Choosing And Using Statistics A Biologists Guide:**

**Choosing and Using Statistics** Calvin Dytham, 2011-01-04 Choosing and Using Statistics remains an invaluable guide for students using a computer package to analyse data from research projects and practical class work. The text takes a pragmatic approach to statistics with a strong focus on what is actually needed. There are chapters giving useful advice on the basics of statistics and guidance on the presentation of data. The book is built around a key to selecting the correct statistical test and then gives clear guidance on how to carry out the test and interpret the output from four commonly used computer packages: SPSS, Minitab, Excel and new to this edition the free program R. Only the basics of formal statistics are described and the emphasis is on jargon-free English but any unfamiliar words can be looked up in the extensive glossary. This new 3rd edition of Choosing and Using Statistics is a must for all students who use a computer package to apply statistics in practical and project work. Features new to this edition: Now features information on using the popular free program R. Uses a simple key and flow chart to help you choose the right statistical test. Aimed at students using statistics for projects and in practical classes. Includes an extensive glossary and key to symbols to explain any statistical jargon. No previous knowledge of statistics is assumed. Choosing and Using Statistics Calvin Dytham, 2003 **Choosing and Using Statistics - a Biologists' Guid E, 4th Edition** C. *Offshore Oil and Gas Environmental Effects Monitoring* Shelley L. Armsworthy, Peter J. Cranford, Kenneth Lee, 2005  
Offshore oil and gas drilling operations take place in some of the world's most biologically productive oceanic waters. An ongoing concern related to the development of this industry is that exposure to contaminants from waste discharges may cause ill effects on organisms and their habitat. Environmental Effects Monitoring (EEM) programs are undertaken to verify environmental impact assessment predictions to detect any unforeseen effects and to help identify cause-effect relationships. EEM has been carried out worldwide for many offshore developments and much has been learned about the fate of drilling and production contaminants and their biological effects. EEM programs have rapidly evolved in response to new knowledge on the transport, fate and effects of potential contaminants, changes in regulatory requirements and improved impact assessment technologies and statistical approaches for data interpretation. In May 2003, an international group of scientists, environmental managers and industry representatives shared their expertise and new knowledge at the Offshore Oil and Gas Environmental Effects Monitoring Workshop. The participants reviewed the status of current offshore oil and gas EEM programs and identified future research needs to advance our understanding of the impacts of the offshore oil and gas industry. This book represents a selected number of peer-reviewed papers from workshop participants covering a range of topics including regional experience from past and ongoing EEM programs, environmental management issues such as risk assessment and decision-making processes, the development of predictive risk assessment models and new approaches and technologies for monitoring potential alterations in benthic, pelagic and tropospheric ecosystem components. This book will be of use to scientists, environmental managers, regulators and industry representatives as well as members of the general public wishing to improve their understanding on the application of offshore oil and gas EEM programs for the protection of our ocean environment and its resources.
