Choosing Reality A Contemplative View Of Physics And The Mind:

Choosing Reality B. Alan Wallace, 1989 How shall we understand the relationship between reality as we experience it and reality as science describes it In examining this question B Alan Wallace discusses two opposing views the realist view which argues that scientific theories represent objective reality and the instrumentalist view which states that our human concepts cannot presume to describe what exists independently of them Finding both of these philosophies of science inadequate the author goes on to explore a middle way between the two extremes based on the centrist position of Buddhism and shows the relevance for modern physics of Buddhist contemplative methods of investigating reality He also examines the ideas of body mind and reincarnation from the point of view of Tibetan Buddhism

Choosing Reality B. Alan Wallace, 1996 Shares the podium with *The Tao of Physics* The Dancing Wu Li Masters and wears the gold medal John Tighe Ph D Daemen College

Choosing Reality B. Alan Wallace, 2003-07-28 Choosing Reality shows how Buddhist contemplative methods of investigating reality are relevant for modern physics and psychology How shall we understand the relationship between the way we experience reality and the way science describes it In examining this question Alan Wallace discusses two opposing views the realist view which argues that scientific theories represent objective reality and the instrumentalist view which states that concepts cannot describe what exists independently of them Finding both of these philosophies of science inadequate the author explores the Buddhist middle way view and the relevance for modern physics of Buddhist contemplative methods of investigating reality He also examines the ideas of body mind and reincarnation from the viewpoint of Tibetan Buddhism

Sleeping, Dreaming, and Dying Dalai Lama, 2002-05-01 This is an absorbing account of a dialogue between leading Western scientists and the foremost representative of Buddhism today the Dalai Lama of Tibet For modern science the transitional states of consciousness lie at the forefront of research in many fields For a Buddhist practitioner these same states present crucial opportunities to explore and transform consciousness itself This book is the account of a historic dialogue between leading Western scientists and the Dalai Lama of Tibet Revolving around three key moments of consciousness sleep dreams and death the conversations recorded here are both engrossing and highly readable Whether the topic is lucid dreaming near death experiences or the very structure of consciousness itself the reader is continually surprised and delighted Narrated by Francisco Varela an internationally recognized neuroscientist the book begins with insightful remarks on the notion of personal identity by noted philosopher Charles Taylor author of the acclaimed *Sources of Self* This sets the stage for Dr Jerome Engel Dr Joyce MacDougal and others to engage in extraordinary exchanges with the Dalai Lama on topics ranging from the neurology of sleep to the yoga of dreams Remarkable convergences between the Western scientific tradition and the Buddhist contemplative sciences are revealed Dr Jayne Gackenbach's discussion of lucid dreaming for example prompts a detailed and fascinating response from the Dalai Lama on the manipulation of dreams by Buddhist meditators The conversations also reveal provocative divergences of opinion as when the Dalai Lama expresses

skepticism about Near Death Experiences as presented by Joan Halifax The conversations are engrossing and highly readable Any reader interested in psychology neuroscience Buddhism or the alternative worlds of dreams will surely enjoy Sleeping Dreaming and Dying

Nature Exposed to Our Method of Questioning Amy Ione,2002 Nature Exposed to our Method of Questioning explores how we create our cultural assumptions about personhood culture and nature The following four questions frame the study 1 How do premodern modern and postmodern perspectives in art religion philosophy and science differ and interpenetrate 2 What does it mean to integrate questions ideas values and beliefs as we create our living environments 3 What are symbols and metaphors and how do they contribute to the human dialogue 4 How do purpose intention and consciousness foster creativity and influence our perceptions of human living Three conclusions emerged in exploring these questions 1 Models of earlier eras are not comprehensive enough to speak about the nature of our contemporary environment 2 Human models are creative human inventions 3 We benefit in defining open models rather than models which attempt to be universal in an all inclusive fashion

Reasonable Perspectives on Religion Richard Curtis,2010-08-04 After the surprising publishing success of the so called New Atheists it has become clear that there is a market for critical discussions about religion A religion is much more complex than a set of beliefs which cannot be proven as the New Atheists argue There is in fact much more to religion and much more to the arguments about its truth claims This book seeks to bring together a range of discussions both critical and apologetic each of which examines some part of religion and its functions Half of the contributors are critical of some element of religion and the other half are apologetic in nature seeking to defend or extend some particular religious argument Covering a wide range of topics including ethics religious pluralism the existence of God and reasonableness of Islam these pieces have in common arguments that are made in careful and scholarly ways they represent reasonable perspectives on a wide swath of contemporary religious debates in contrast to the unreasonableness that creeps into discussions on religion in American society

The Interdependent Organization Rexford H. Draman,2017-09-08 The Interdependent Organization provides its readers with a template for the development of an individualized transition plan to guide their journey toward becoming more organizationally sustainable We as humans tend to rely on our current set of assumptions when we evaluate our actions and their potential impact on the future With today s ever increasing rate of change in technology our access to information and cultural interactions interdependence around the world the reliance on old ways of thinking linear will not allow us to effectively transition into the systems based world of tomorrow The Interdependent Organization presents a deeper understanding of the financial operational and cultural crossroads we are facing as a planet and introduces a systems based transitional path that individuals organizations and societies can draw on to move towards a more holistic and sustainable future The book provides readers with the necessary understanding and insight into systems systems thinking and the use of systems based business tools to guide the sustainability journey while producing a positive impact to the organization s bottom line its employee engagement and its

stakeholders expectations in each of the journey s three stages The journey begins with the adoption of simple yet powerful systems based tools for managing the organization s operations and projects These proven tools provide increased productivity with a proven bottom line improvement that exceeds 30% This introduction to systems based tools and thinking provides the organization with the time to become more familiar with this new way of thinking and making business decisions before they expand their exposure to broader more complex systems based and sustainable practices The second stage of this journey is focused on introducing new tools and practices to insure a consistent set of measures are used across the organization The third and final stage focuses on aligning the organization s people management practices **Facing Facts**

Alan Wallace,2004 In this society with its hurly burly pace demanding of our time it is ever so easy to let life slip by The process of simply existing is not necessarily meaningful And yet there is an unlimited potential for meaning and value in this human existence The Seven Point Mind Training is one eminently practical way of tapping into that meaning The central theme of the Seven Point Mind Training is to make the liberating passage from the constricting solitude of self centeredness to the warm kinship with others which occurs with the cultivation of cherishing others even more than oneself This mind training technique is especially well suited for an active life It does not require that we withdraw into seclusion but that we re examine all of our relationships to family friends enemies and strangers and gradually transform our responses to whatever life throws our way Book jacket **The Happiest, Most Dissatisfied People on Earth** Michael G. Aspects of Metaphor in Physics Hanna Pulaczewska,1999 For decades there has been awareness of the fact that the natural sciences and the language they use are not metaphor free domains This study draws together statements on this phenomenon made in a discourse context hitherto dominated by theoreticians and philosophers of science and points up new perspectives of an interdisciplinary nature discussed here primarily from the viewpoint of cognitive semantics How do metaphors enter into a discourse with physics To what extent are the methods used and the issues addressed in physics influenced by metaphors How do the ubiquitous metaphors of everyday language help us to impose a structure on physics knowledge and express abstract ideas in concrete images These and other related issues are discussed with reference to
