Mark Casson

Choosing The Right Pond Human Behavior And The Quest For Status:

Choosing the Right Pond Robert H. Frank, 1985 Is money the major factor in shaping the marketplace Is salary the prime consideration in job satisfaction Not necessarily according to Robert Frank Economists Frank charges have refused to treat people as people and consequently they have painted a distorted picture of the marketplace Economists have too often neglected fundamental elements of human nature and therefore have failed to ask many obviously important questions and have offered wrong or at best misleading answers to the questions they do ask This challenging and provocative book offers an alternative to the prevailing view of human beings as economic automatons Individual desires notably the quest for status profoundly affect the marketplace Status concerns play dominant roles in many of the most important private transactions and underlie much of the regulatory apparatus we observe in the modern welfare state Frank writes The book offers a radical reinterpretation of what private markets can and cannot do and suggests new ways of looking at familiar regulations and social programs Many of the issues discussed touch directly upon the strongest concerns we feel as human beings struggling to define our roles and affirm our importance in the world around us About the Author Robert H Frank is Associate Professor of Economics at Cornell University He is the co author with Richard Freeman of *The Distributional Consequences of Direct Foreign Investment* Choosing the Right Pond Robert H. Frank, 1985 Is it better to be a big frog in a small pond or a small frog in a big pond Here economist Robert H Frank argues that concerns about status permeate and profoundly alter a broad range of human behavior He shows how status considerations affect the salaries people earn the way they spend them and even many of the laws regulations and cultural norms they adopt Provocative and insightful this book is sure to spark widespread and lively debate in classrooms and boardrooms alike *Choosing the Right Pond* Robert H. Frank, 1986

Handbook of Social Economics SET: 1A, 1B Jess Benhabib, Alberto Bisin, Matthew O. Jackson, 2011 How can economists define and measure social preferences and interactions Through the use of new economic data and tools our contributors survey an array of social interactions and decisions that typify homo economicus Identifying economic strains in activities such as learning group formation discrimination and the creation of peer dynamics they demonstrate how they tease out social preferences from the influences of culture familial beliefs religion and other forces Advances our understanding about quantifying social interactions and the effects of culture Summarizes research on theoretical and applied economic analyses of social preferences Explores the recent willingness among economists to consider new arguments in the utility function

The Utopian Dilemma in the Western Political Imagination John Farrell, 2023-03-31 In this volume John Farrell shows that political utopias societies with laws and customs designed to short circuit the foibles of human nature for the benefit of our collective existence have a perennial opponent the honor based culture of aristocracy that dominated most of the world from ancient times into early modernity and whose status based competitive psychology persists to the present day While utopias aim at equality the heroic imperative defends the need for personal and collective dignity It asks the utopian Do we really

want to live in a world without struggle without heroes and without the stories they create Because the utopian dilemma pits essential values against each other equity versus freedom dignity versus justice few who confront it can simply take sides Rather the dilemma itself has been a generative stimulus for classic authors from Plato and Thomas More to George Orwell and Aldous Huxley Farrell follows their struggles with the utopian dilemma and with each other providing a deepened understanding of the moral and emotional dynamics of the western political imagination Introduction Chapter 8 Chapter 9 Chapter 15 Chapter 16 and Conclusion of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Handbook of Social Economics, 2010-11-26 How can economists define social preferences and interactions Culture familial beliefs religion and other sources contain the origins of social preferences Those preferences the desire for social status for instance or the disinclination to receive financial support often accompany predictable economic outcomes Through the use of new economic data and tools our contributors survey an array of social interactions and decisions that typify homo economicus Their work brings order to the sometimes conflicting claims that countries environments beliefs and other influences make on our economic decisions Describes recent scholarship on social choice and introduces new evidence about social preferences Advances our understanding about quantifying social interactions and the effects of culture Summarizes research on theoretical and applied economic analyses of social preferences [Remapping the Humanities](#) Mary Garrett, Heidi Gottfried, Sandra F. VanBurkleo, 2008 An innovative collection demonstrating the rich potential for interdisciplinary learning found within the network of university based humanities centers Remapping the Humanities celebrates the tenth anniversary of the Wayne State University Humanities Center by bringing together essays that illustrate the richness of public conversations developed in interdisciplinary humanities centers The contributors to this collection represent more than a dozen disciplines including philosophy English political science history law comparative literature and Spanish and taken together their essays illustrate an ongoing remapping of the intellectual landscape as scholars from across university departments engage one another in unpredictable ways This volume is divided into four thematic sections Identity and Community Remembering and Forgetting Nationalism and Globalism and Toward Post Modernity Yet the essays deliberately represent a range of theoretical perspectives that interact synergistically such as feminism and postcolonial studies or literary criticism and art history They also tackle topics as varied as the formation of the modern family in France and the inculcation of civic virtue in American cities and they draw freely from different sources of evidence like newspaper accounts popular literature paintings and diaries Remapping the Humanities includes unique touches such as a portfolio of full color images and an audio CD of Celtic inspired jazz In addition a preface by Walter Edwards academic director of the Humanities Center at Wayne State University gives some background on this institution and the work being done there The importance of Remapping the Humanities ultimately lies in its refusal to say that learning has ended and the example it

provides of the value of calculated ferment and intellectual instability Educators involved with or wanting to learn more about interdisciplinary research will appreciate this unique collection **Economic Principles** David Warsh,2010-06-15 For nearly ten years readers of the Sunday Boston Globe and newspapers around America have delighted in David Warsh's column Economic Principals This collection shows why Taken as a whole Warsh's writings amount to a vast and colorful group portrait of the personalities who dominate modern economics from the luminaries to unknown soldiers to eccentrics who add sparkle to the tapestry Partly a history of controversies in economics partly an essay on the evolution of the field Economic Principals offers a glimpse of one of the most important stories of our time the metamorphosis of a priestly class of moral philosophers into the mathematical mandarins of today whose ideas are reshaping society even as they reveal its workings in ever more subtle detail Warsh first recounts the rise of the economic paradigm deftly treating the rediscovery of Adam Smith and the centrality of markets He then turns to the generation of economists for whom the Nobel Prize was created in 1969 the men who forged the modern field in a few years during and after World War II Some like Paul Samuelson and Milton Friedman are well known to the public others like Trygve Haavelmo and George Dantzig are less quickly recognized But all have interesting stories which Warsh brings to light Tracing the high tech revolution to the current generation he sketches younger scholars such as Jeffrey Sachs Martin Feldstein and others less popularly known who rule the field today Marking the most powerful applications of modern economics Warsh explains how the ingenious rocket scientists of Wall Street are creating new markets and the business school wizards and leading corporate executives are reinventing the organization Finally in exploring the implications of modern economics Warsh introduces us to scholars operating on the boundaries of the field from Jane Jacobs to Noam Chomsky and to the critics like Donald McCloskey and Robert Reich who have brought a bit of moral philosophy back into the economist's brave new world At every step Warsh maps the field with the journalist's eye for detail Readers will see why he is considered one of the most consistently stimulating economic journalists in America today Neural basis of social learning, social deciding, and other-regarding preferences Steve W C Chang,Masaki Isoda,2015-03-02 Humans and many other social animals decide or learn when necessary what to do in a given social situation by assessing a range of variables related to social states e.g competitive or cooperative others overt behavior e.g response choices and outcomes others covert mental states e.g beliefs intentions and desires and one's own interpersonal inclination e.g other regarding preferences and generosity Recent studies in social neuroscience have begun to uncover how such social variables are processed encoded and integrated in the brain The goal of the current Research Topic is to promote a better understanding of neural basis of social learning social decision making and other regarding preferences *Microeconomics and Behavior* Robert H. Frank,Amy Jocelyn Glass,2000 Robert Frank's *Microeconomics and Behavior* covers the essential topics of microeconomics while exploring the relationship between economics analysis and human behavior The book's clear narrative appeals to students and its numerous examples help

students develop economic intuition This book introduces modern topics not often found in intermediate textbooks Its focus throughout is to develop a student s capacity to think like an economist Controlling Public Education Kathryn A. McDermott,1999 Most Americans believe that local school districts are the only means by which citizens may exercise control over public education Kathryn McDermott argues to the contrary that existing local institutions are no longer sufficient for achieving either equity or democratic governance Not only is local control inequitable it also fails to live up to its reputation for guaranteeing public participation and citizen influence Drawing upon democratic theory and the results of field research in New Haven Connecticut and three suburbs McDermott contends that our educational system can be made more democratic by centralizing control over funding while decentralizing most authority over schools to the level of schools themselves while enacting public school choice controlled for racial balance To many people in Connecticut and elsewhere the tension between equal opportunity for all students and local control of public education seems impossible to resolve In 1996 the Connecticut Supreme Court ruled in *Sheff v O Neill* that local control produces unconstitutional segregation of public schools Nearly all of the state s 169 towns operate their own public schools and like the towns they serve the schools are generally homogeneous with respect to race and socioeconomic class In the *Sheff* ruling the court declared that making school districts coterminous with town lines is the single most important factor contributing to the present concentration of racial and ethnic minorities in the Hartford public school system At the same time the court also acknowledged that the town based school system presently furthers the legitimate nonracial interests of permitting considerable local control and accountability in educational matters In Connecticut and elsewhere it has often seemed necessary to choose between local control and equity in public education and local control has almost always won McDermott argues that rather than seeing local control and equity as conflicting goals policymakers should regard them as equally important components of democracy in public education In her view a truly democratic system of education should both encourage citizen participation in school governance and contribute to the formation and maintenance of a social order in which equality of opportunity prevails over hierarchies of privilege Centralizing distribution of resources and using controlled choice to end racial isolation would provide greater equality of opportunity while decentralizing management of schools would expand citizen participation McDermott s conclusions break new ground in our understanding of local school governance itself and call into question the conventional wisdom about local participation These findings should interest those who study school governance and reform especially in an urban setting as well as policy makers administrators teachers students and citizens eager to improve their schools **Survey of Social Science** Frank Northen Magill,1991 Macroeconomics Laurence S. Seidman,1987

Psychological and Physiological Correlates of Acute and Chronic Threat to the Social Self Tara Lynn Gruenewald,2003 **Journal of Institutional and Theoretical Economics** ,2003 **The American Economist** ,2006
