Choosings For Children:

Choosing Children Jonathan Glover, 2008-01-10 Progress in genetic and reproductive technology now offers us the possibility of choosing what kinds of children we do and don't have. Should we welcome this power or should we fear its implications? There is no ethical question more urgent than this: we may be at a turning point in the history of humanity. The renowned moral philosopher and best-selling author Jonathan Glover shows us how we might try to answer this question and other provoking and disturbing questions to which it leads. Surely parents owe it to their children to give them the best life they can. Increasingly we are able to reduce the number of babies born with disabilities and disorders. But there is a powerful new challenge to conventional thinking about the desirability of doing so: this comes from the voices of those who have these conditions. They call into question the very definition of disability. How do we justify trying to avoid bringing people like them into being? In 2002 a deaf couple used sperm donated by a friend with hereditary deafness to have a deaf baby; they took the view that deafness is not a disability but a difference. Starting with the issues raised by this case, Jonathan Glover examines the emotive idea of eugenics and the ethics of attempting to enhance people for non-medical reasons by means of genetic choices. Should parents be free not only to have children free from disabilities but to choose for instance the colour of their eyes or hair? This is no longer a distant prospect but an existing power which we cannot wish away. What impact will such interventions have both on the individuals concerned and on society as a whole? Should we try to make general improvements to the genetic make-up of human beings? Is there a central core of human nature with which we must not interfere? This beautifully clear book is written for anyone who cares about the rights and wrongs of parents' choices for their children: anyone who is concerned about our human future. Glover handles these uncomfortable questions in a controversial but always humane and sympathetic manner.

Choosing Our Children Luther Burbank Society, 1914 **The Ethics of Choosing Children** Simon Reader, 2017-09-02 This book takes the contentious issue of designer babies and argues against the liberal eugenic current of bioethics that commends the logic and choice regimes of selective reproduction. Against conceptions of Procreative Beneficence that trade on a disregard for the gifts of maternal bodies, it seeks to recover a thought of maternal giving and a more hospitable ethic of generational beneficence. Exploring themes of responsibility, gift and natality, the book refigures the experience of reproduction as the site of an ethical response to future generations where refusal to choose one's children is one virtuous response. The book will appeal to anyone with an interest in reproductive ethics, feminist thought and those seeking principled grounds for resisting the technologies of choosing children. Children, the Magazine for Parents, 1927 *Choosing Toys for Children* Sten Hegeler, 1963 **Choosing Books for Younger Children** Antony Kamm, 1977 **Child Study**, 1927 **Choosing Schools and Child Care Options** Nancy H. Phillips, 1994 Reading Research at Work Katherine A. Dougherty Stahl, Michael C. McKenna, 2006-04-20 This book presents state of the science research on the components of successful literacy learning and how to target them in

contemporary classrooms The volume builds on and extends the work of Steven Stahl whose pioneering contributions encompassed the key areas of phonemic awareness phonics vocabulary fluency comprehension and assessment Ten classic papers by Stahl are accompanied by 16 new chapters by other leading experts who highlight Stahl's theoretical methodological and instructional innovations describe how knowledge about each domain continues to evolve and discuss implications for helping all children become better readers
