Chinese Education In Transition:

Chinese Education in Transition Julia Kwong, 1979 *Rural Education in China's Social Transition* Peggy A. Kong, Emily Hannum, Gerard A. Postiglione, 2020-12-17 In the first decade of the twenty first century the People's Republic of China experienced dramatic growth and expansion that altered the educational environment of children. Rapid economic development increased prosperity and educational opportunities for children expanded in a wealthier society. Yet a by-product of rising wealth was rising inequality. While the children of the emerging urban middle and elite classes enjoyed new prosperity, the children of the persistently poor in rural communities continued to experience challenges such as food insecurity, illness, hardships of family separation and migrant life on the margins of the cities. This time period saw a large resource gap emerge between the home conditions of poor rural children compared with those of their wealthier urban counterparts. This book highlights the complexities China has experienced in seeking to extend full educational access to rural children including rural to urban migrant and ethnic minority children during a momentous period in China. Chapters delve into the experiences, perceptions, strategies and difficulties of rural origin children and their families in the school system and lay bare the challenges of policy initiatives designed to support rural education. We hope the experiences detailed here will be of interest to students and scholars of rural educational policy and practice in China and worldwide. Bourdieu and Chinese Education Guanglun Michael Mu, Karen Dooley, Allan Luke, 2018-10-26 This book uses Bourdieu's sociological approach for research as a jumping off point for framing our understandings and analyses of China and Chinese education. Three major themes: inequality, competition and change are explored across several theoretical and contextual bases. Bringing together top scholars in the field, the volume examines empirical studies that analyse social mobility through education for students affected by the social divides of class, culture and rural/urban locations; teacher identity and the field of schooling in the current Chinese environment; and going forward and the university as an institution for the production of knowledge about education in the globalising academy. Offering insights into the historical and cultural context for China's educational landscape, the contributions of this book revisit Bourdieusian concepts from a new empirical vantage point and bring together key studies that illuminate new pathways for the study of Chinese sociology of education. Re-envisioning Chinese Education Guoping Zhao, Zongyi Deng, 2015-10-30 Maintaining education as a pedagogical space for human formation, this book is distinctive in looking at the crisis rather than the success of Chinese education. The editors and contributors, mostly overseas and mainland Chinese scholars, argue that modern Chinese education has been built upon a superficial and instrumental embrace of Western modernity and a fragmented appropriation of Chinese cultural heritage. They call for a rethinking and re-envisioning of Chinese education grounded in and enriched by various cultural traditions and cross-cultural dialogues. Drawing on Chinese history and culture, Western and Chinese philosophies, curriculum and pedagogical theories, the collected volume analyzes 1) why education as person-making has failed to take root in contemporary China, 2) how the

purpose of education has changed during the process of China's modernization and 3 what a rediscovery of the meaning of person making implies for rethinking and re-envisioning Chinese education in the current age of globalization and social change

Re-envisioning Chinese Education The meaning of person making in a new age discusses among other issues China's Historical Encounter with the West and Modern Chinese Education Rediscover Lasting Values Confucian Cultural Learning Models in the Twenty-first Century Rethinking and Re-envisioning Chinese Didactics Implications from the German Didaktik Tradition The New Basic Education and the Development of Human Subjectivity A Chinese Experience This book will be relevant for scholars researchers and policy makers everywhere who seek a more balanced more sophisticated and philosophically better grounded understanding of Chinese education

The Formulation and Transition of China's Education Policy from 1978 to 2007 Wen Wen, 2013

Recontextualising and Recontesting Bourdieu in Chinese Education Guanglun Michael Mu, Karen Dooley, 2023-08-25 For more than 40 years researchers have explored the utility of Bourdieu's sociology for settings beyond the French and Algerian contexts of its origin This edited collection has a focus on China applying Bourdieu's analysis of practice as Chinese education gains relevance and attention around the globe Grounded in empirical research Recontextualising and Recontesting Bourdieu in Chinese Education advances Bourdieu's analysis of practice beyond national scales while producing new knowledge about the generation of habitus mobilities and languages in relation to Chinese education Locating Chinese education within national and transnational contexts this collection grapples with the structural invariances and inequivalences between Chinese education and society on the one hand and social spaces in other parts of the world on the other hand Through chapters that examine social mobility in the context of cross border movement and delve into questions of language and power this book recontests and problematises the use of Bourdieu's sociology to theorise social classification and differentiation in China This book is essential reading for Chinese educational researchers and practitioners Bourdieusian scholars with particular interests in education and sociologists of education broadly
