Chinese Economic Reforms:

China's Three Decades of Economic Reforms Xiaohui Liu, Wei Zhang, 2009-09-10 China's economy continues to grow rapidly with important consequences for its own society and environment as well as for the wider world economy. This book provides much needed insight using the latest research findings into China's successful reform experience and its challenges over three decades.

Growing Out of the Plan Barry Naughton, 1995 This is a comprehensive study of China's economic reforms from their beginnings at the end of 1978 through the completion of many of the initial reform measures during 1993. The features of Chinese reform that differ from the former USSR are highlighted.

The Chinese Economic Reforms Stephan Feuchtwang, Athar Hussain, 2018-09-18 This book first published in 1983 examines the significant economic reforms undergone by China following the death of Mao and the downfall of the Gang of Four. It looks at Chinese economists' conceptions of the necessity for change and compares China's reforms with similar ones carried out by the Soviet Union and Eastern Europe. There is a detailed analysis of the different sectors of the economy which shows how the reforms were carried out in practice.

China's Economic Reform and Development during the 13th Five-Year Plan Period Gang Lin, Yiming Wang, Xiaohe Ma, Debu Gao, 2020-09-23 Five Year Plans have been a cornerstone of Chinese social and economic development initiatives since 1953. During the thirteenth of these periods between 2016 and 2020 the global economy has experienced instability after the financial crisis as well as political and economic reconfiguration. Drawing on modern economic theory this book comprehensively discusses China's economic development in this crucial phase. The book analyzes the international economic environment and asks how China's continued reform and opening up can fit with the new era of economic globalization. It also presents the difficulties China faces in such fields as urbanization, the coordination of regional development and urban-rural integration, economic reform and the reform of factor markets and state-owned enterprises. The book outlines many medium-term development rules along with key characteristics of China's economy helping international readers fully understand likely future trajectories for the Chinese economy.

The Logic of Economic Reform in China Xiaojing Zhang, Xin Chang, 2015-11-19 This book provides a historical overview of Chinese economic reform over the past 30 years. From the genesis of the reform to the gradual improvement of the market system and then to the re-start of the critical stage of the reform, this book includes not only research on the reform process but also detailed descriptions of the key areas of reform since the Third Plenary Session of the 18th CPC Central Committee. On this basis, the author develops six logics for Chinese economic reform. Firstly, reform is cyclical, moving between rapid advances and deadlock; this calls upon us to re-examine the common view of reform. Secondly, reform is systematic; it cannot succeed without supporting reforms in other fields. Thirdly, the relationship between reform, development and stability should be properly handled. This trinity is quite different from the perspective of western mainstream theory which puts too much emphasis on efficiency. Fourthly, the success of Chinese reform was not achieved by chance. The reform practice is based on the theoretical logic and also goes

beyond the debate between progressive and radical modes Fifthly the Top level Design should be combined with crossing the river by moving from stone to stone i e the theoretical basis of reform should be combined with reform practice Sixthly and lastly the ongoing reform in China must be understood in the contexts of global competition and reform competition *The Logic of the Market* Weiying Zhang,2015-01-20 *The Logic of the Market* by Weiying Zhang considered China's leading market liberal comprises his most influential essays on economics over the past three decades First published in China in 2010 this revised edition contains three new essays which offer those outside China a deeper understanding of the Chinese economy Market competition is a really just competition to create value for others Only through this approach did the Western economy advance over the past 200 years It is also the reason for China's economic marvel over the past 30 years writes Weiying Readers will appreciate Weiying's ability to address both everyday economic issues and the questions that confront a nation's leaders not the least a nation seeking to escape mass poverty The economic reforms and subsequent growth in China may be the most astonishing and hopeful event of our age Weiying was among the leaders who set China on its path of change Here he elucidates the pitfalls and the progress of economic reform celebrating leaders who mixed sustained idealism with judicious compromise Readers seeking to learn from China's successes will find much of interest here Weiying emphasizes the importance of entrepreneurs in the new China He concludes The key for China as the country with the world's largest population to return to being the largest economy lies in allowing the entrepreneurial spirit to develop the potential of the domestic market For that to happen Weiying recommends that China continue to reduce the state owned economy lessen government control over the economy and over the next 30 years emphasize political reform to build a constitutional democracy His thinking is not limited to China Some of these essays also focus on the global financial crisis how Keynesian policies can only be effective for the short term and will bring long term negative consequences Weiying provides a unique perspective on his country's market economy implementation of economic policies and the potential for Chinese economic development I hope that the logic of the market becomes every person's ideal he writes That is my reason for writing this book **Narratives of Chinese Economic Reforms** Xibao Zhang,Shenggen Fan,Arjan de Haan,2010 Ch 1 Introduction policy reforms as a process of learning Xiaobo Zhang Arjan de Haan and Shenggen Fan ch 2 The course of China's rural reform Du Runsheng ch 3 Collective learning capacity and choice of reform path theoretical reflections on the dual track system of price reform process Luo Xiaopeng ch 4 The formation and evolution of China's migrant labor policy Cai Fang ch 5 Narratives of Wenzhou's industrial privatization Zhu Kangdui ch 6 The process of establishing and extending direct elections in rural China Wang Zhenyao ch 7 The historical opportunity of the fiscal reform Liu Zhongli ch 8 Fiscal reform the Zhejiang experience Weng Lihua ch 9 China's reforms are there lessons for other countries Arjan de Haan Xiaobo Zhang and Shenggen Fan *China's Economic Reform* Raphael Shen,2000-02-28 Both Mao Zedong and Deng Xiaoping drastically altered the course of contemporary China's economic development using opposing

strategies Mao froze China's economic system in a perennial state of consumer goods shortages and pervasive macro disequilibria Deng however began thawing a rigidly structured system by introducing experimental reform measures Mao's revolutionary rhetoric brought China's economy to the brink of bankruptcy Deng's ideological pragmatism netted China glowing successes Mao closed China to the outside world Deng engineered China's reintegration into the world economy Dismantling a dysfunctional system and replacing it with a dynamic new one involving 1.2 billion people is risk laden Reform in China began in 1978 It was tentative and experimental confining reform to organizational and administrative decentralization on farms Successes on farms ushered in reform elsewhere in the economy Over time market based coordinating mechanisms progressively began replacing the system's control devices Results from decentralization internally reinforced those from liberalization externally This consequently transformed China's stale distorted system into a more competitive bustling new one ready for developmental takeoff Its meteoric rise among the world's leading markets in recent years has thrust China's economy to the forefront of growth and development Controlled phased reform is yielding dividends not only for its own consumers but for international economic cooperation and growth as well

China's Economic Reforms Peter Nolan, Qimiao Fan, 1993-11-26 This book examines key issues in each of the major sectors of the Chinese economy It uses a wide range of primary research materials and subjects them to rigorous analysis It illuminates the way in which China's step by step reform affected different parts of the economy It identifies many difficulties resulting from this approach It also enables readers to understand why this broad strategy of reforming a communist planned economy was so successful in the Chinese case

Planning and Finance in China's Economic Reforms Thomas P. Lyons, Yan Wang, 1988

The China Miracle Justin Yifu Lin, Fang Cai, Zhou Li, 2003 Using a historical comparative and analytic approach grounded in mainstream economics the authors develop a consistent and rational framework of state owned enterprises and individual agents to analyze the internal logic of the traditional Chinese planning system In this revised edition the authors update the data and information in the book and include a new chapter on the impact of China's WTO accession on its reform

China's Reform in Global Perspective John Wong, Zhiyue Bo, 2010 This book provides a fascinating perspective of the experiences of China's reform in the past three decades by focusing on China's interaction with and learning from the external world in her unprecedented efforts to reform and open up After three introductory chapters on broad scope of reform in the political economic and social realms this book deals with lessons from the Eastern Bloc China's reform in East Asian context and China and the developed world The book concludes with two chapters looking to the future of China's political and economic development In the existing literature of China's reform experience this book is unique in perspective topic selection and in depth analyses With contributions from a group of prominent scholars in the field of China studies such as John Wong Zheng Yongnian Thomas P Bernstein Dorothy J Solinger and Bo Zhiyue it will be of immense value to anyone who is interested in China

China's Economic Reform Zhang Yu, 2017-10-12 China's growth miracle over the past 30 years has propelled it

to become the world's second largest economy and potentially the largest in the following years. This book examines China's experience on economic reform, trying to find the reasons for the sustainable and rapid development and provide insights into the study of economic theories. From the perspective of political economics, this book elaborates on China's socialist market economy which was officially confirmed as the goal of the country's economic reform in 1992. It expounds on China's economic model, the relationship between socialism and market economy as well as the establishment and improvement of socialist market economy in China, deepening the studies in the laws governing China's economic development. Then it explores the gradual reform, the reform of state-owned enterprises and the relationship between governments and market, all of which are crucial to the success of China's economic reform. Finally, based on the analysis above, this book discusses the reasons for the constant and rapid development of China's economy. With detailed analysis on the reform experience and theoretical implications, this book will appeal to scholars and students studying China's economy and contribute to the development of economic theories.

Chinese Economic Policy Ilpyong J. Kim, Bruce Lloyd Reynolds, 1988

An Essay on Economic Reforms and Social Change in China Assar Lindbeck, 2006

Abstract: The author applies a systems-oriented holistic approach to China's radical economic reforms during the past quarter of a century. He characterizes China's economic reforms in terms of a multidimensional classification of economic systems. When looking at the economic consequences of China's change of economic system, he deals with both the impressive growth performance and its economic costs. The author also studies the consequences of the economic reforms for the previous social arrangements in the country, which were tied to individual work units, agriculture communes, collective firms, and state-owned enterprises. He continues with the social development during the reform period, reflecting a complex mix of social advances, mainly in terms of poverty reduction and regresses for large population groups in terms of income security and human services such as education and, in particular, health care. Next, the author discusses China's future policy options in the social field, whereby he draws heavily on relevant experiences in industrial countries over the years. The future options are classified into three broad categories: policies influencing the level and distribution of factor income; income transfers including social insurance; and the provision of human services.

Economic Lessons from China's Forty Years of Reform and Opening-up David Daokui Li, 2021-03-26

This book first shows that the past 40 years of China's economic reform and opening up represents the greatest magnitude of economic growth in history. Based on field trips, extensive and intensive interviews, and literature surveys, this book argues that there are five general lessons for a rapidly growing economy from China's economic reform and opening up, all in the area of the relationship between the government and the economy. First, the local governments need to

be incentivized to help rapid entry and development of enterprises Second local governments need to be incentivized to help rapid land conversion from agricultural to non agricultural Third financial deepening is vital that is inducing households to hold more and more financial assets in local currency Financial deepening is essential to convert savings into investments This requires financial stability which is crucial Fourth the learning through opening up is the key to endogenous economic growth The fundamental benefit of opening up is learning rather than enjoying comparative advantage The fifth and final lesson from China is that the central government must proactively manage the macroeconomy The rationale is that enterprises compete with each other in games of industrial organization In order to resolve this problem proactive measures including market oriented means administrative orders and reform measures should be implemented Overall the main lesson from China's past 40 years of reform and opening up is that proper incentives and behavior of the government local and central are important for economic growth China has been conducting reforms in this regard and as a result the government more or less has been playing the role of a helping hand regarding economic growth although China's economic system is far from perfect and many reforms are still needed

The Political Logic of Economic Reform in China Susan L.

Shirk, 2023-04-28 In the past decade China was able to carry out economic reform without political reform while the Soviet Union attempted the opposite strategy How did China succeed at economic market reform without changing communist rule Susan Shirk shows that Chinese communist political institutions are more flexible and less centralized than their Soviet counterparts were Shirk pioneers a rational choice institutional approach to analyze policy making in a non democratic authoritarian country and to explain the history of Chinese market reforms from 1979 to the present Drawing on extensive interviews with high level Chinese officials she pieces together detailed histories of economic reform policy decisions and shows how the political logic of Chinese communist institutions shaped those decisions Combining theoretical ambition with the flavor of on the ground policy making in Beijing this book is a major contribution to the study of reform in China and other communist countries In the past decade China was able to carry out economic reform without political reform while the Soviet Union attempted the opposite strategy How did China succeed at economic market reform without changing communist rule Susan Shirk shows that China

The Gradual Revolution Hui Wang, 1994-01-01 The Uprising at Tiananmen Square may have been crushed politically but it has had extraordinary consequences in opening up China to new varieties of economic experimentation Nowhere has this fusion of political repression and economic opportunity been better captured than in Hui Wang's masterful study And given the world wide and historic importance of China this volume deserves most careful consideration Given his unique background as a former assistant director of the China National Economic Reform Institute CNERI in Beijing and before that a board member of The Economic Daily in the capital city of China he is able to provide the sort of first hand account that deeply enriches this fundamental treatise on the transformation of the Chinese economy from a centrally planned to a market system This book should prove to be especially timely as American investors

and businessmen are pouring into China for new commercial ventures while scholars are likewise coming to China in order to obtain information and experience to benefit other struggling formerly socialist economies Wang makes no claim that present day China is necessarily a model for the rest of Asia or Eastern Europe but he does make plain that variations on the theme of a free market and a controlled polity are as much part of Leftist as well as Rightist regimes As a result this book should have appeal quite beyond undergraduate and graduate courses in modern China and should extend to those political scientists and sociologists who take seriously fundamental themes of development China in the New Millennium James A. Dorn, 1998 China is expected to become the world's largest economy in less than two decades Whether it does so will depend on continued growth of the non state sector and how well China adapts to global market forces The essays in this volume consider the state of China's economic reforms the institutional changes necessary for China to become a global economic power and the interplay between market reforms and social development in China
