Framing China Dr Ariane Knüsel, 2012-09-01 Framing China sheds new light on Western relations with and perceptions of China in the first half of the twentieth century In this ground breaking book Ariane Knüsel examines how China was portrayed in political debates and the media in Britain the USA and Switzerland between 1900 and 1950 By focusing on the political economic cultural and social context that led to the construction of the particular images of China in each country the author demonstrates that national interests anxieties and issues influenced the way China was framed and resulted in different portrayals of China in each country The author s meticulous analysis of a vast amount of newspaper and magazine articles commentaries editorials cartoons and newsreels that have previously not been studied before also focuses on the transnational circulation of images of China While previous publications have dealt with the occurrence of the Yellow Peril and Red Menace in particular countries Framing China reveals that these images were interpreted differently in every nation because they both reflected and contributed to the discursive construction of nationhood in each country and were influenced by domestic issues cultural values pre existing stereotypes pressure groups and geopolitical aspirations

After Tamerlane John Darwin, 2007 After Tamerlane is an immensely important and stimulating work It takes a fresh look at our global past Our idea of world history is still dominated by the view from the West it is Europe s expansion that takes centre stage But for much of the six hundred year span of this book Asia s great empires seemed much more than a match for the intruders from Europe It took a revolution in Eurasia to change this balance of power although never completely The Chinese empire against all the odds has survived to this day The British empire came and went The Nazi empire was crushed almost at once The rise fall and endurance of empires and the causes behind them remain one of the most fascinating puzzles in world history
