Choice Deceptions:

Choice Deceptions Emma Jensen, 1995-12-30 Seeking to escape her greedy relatives Aurelie Carollan advertises for a husband and finds Lord Tarrant who believes he can avoid love in a marriage of convenience until he gets to know his wife a little better Original

Matters of Life and Death David Orentlicher, 2021-03-09 Philosophical debates over the fundamental principles that should guide life and death medical decisions usually occur at a considerable remove from the tough real world choices made in hospital rooms courthouses and legislatures David Orentlicher seeks to change that drawing on his extensive experience in both medicine and law to address the translation of moral principle into practice a move that itself generates important moral concerns Orentlicher uses controversial life and death issues as case studies for evaluating three models for translating principle into practice Physician assisted suicide illustrates the application of generally valid rules a model that provides predictability and simplicity and more importantly avoids the personal biases that influence case by case judgments The author then takes up the debate over forcing pregnant women to accept treatments to save their fetuses He uses this issue to weigh the avoidance of perverse incentives an approach to translation that follows principles hesitantly for fear of generating unintended results And third Orentlicher considers the denial of life sustaining treatment on grounds of medical futility in his evaluation of the tragic choices model which hides difficult life and death choices in order to prevent paralyzing social conflict *Matters of Life and Death* is a rich and stimulating contribution to bioethics and law It is the first book to examine closely the broad problems of translating principle into practice And by analyzing specific controversies along the way it develops original insights likely to provoke both moral philosophers and those working on thorny issues of life and death

Decision-Making Experiments under a Philosophical Analysis: Human Choice as a Challenge for Neuroscience Gabriel José Corrêa Mograbi, Carlos Eduardo Batista de Sousa, 2015-10-15 This introduction just aims to be a fast foreword to the special topic now turned into an e book The Editorial *Decision Making Experiments under a Philosophical Analysis Human Choice as a Challenge for Neuroscience* alongside with my opinion article *Neurophilosophical considerations on decision making Pushing up the frontiers without*

disregarding their foundations play the real role of considering in more details the articles and the whole purpose of this e book What I must highlight in this foreword is that our intention with such a project was to deepen into the very foundations of our current paradigms in decision neuroscience and to philosophically moot its foundations and repercussions Normal Science a term coined by Philosopher Thomas Kuhn works under a research consensus among a scientific community A shared paradigm consolidated methods widespread convictions Pragmatically winning formulas must be kept although not at any cost What differentiates a gifted and revolutionary scientist from a more bureaucratic colleague is the capacity and willingness of constantly reevaluating depurating and refining his her own paradigm That is best strategy to avoid that a paradigm itself would gradually come under challenge In my view some achievements in this sense were brought about in our project The e book will be inspiring and informative for both neuroscientists that are concerned with the very foundations of their works and for philosophers that are not blind to empirical evidence Kant once said Thoughts without content are empty intuitions without concepts are blind Paraphrasing Kant we could say Philosophy without science is empty science without philosophy is blind
