Choices And Chances Sociology For Everyday Life:

Choices And Chances Lorne Tepperman, 2019-03-11 *Choices and Chances* is an ideal supplement to introductory textbooks. By showing how theories can apply to everyday life, it demonstrates the ways sociology is a living, growing discipline that can shed light on issues of immense personal and social importance.

Choices and Chances Lorne Tepperman, 1988 **Canadian Sociologists in the First Person** Stephen Harold Riggins, Neil McLaughlin, 2021-08-15 Social scientists' autobiographies can yield insight into personal commitments to research agendas and the very project of social science itself. But despite the long history of life writing, sociologists have tended to view the practice with skepticism. *Canadian Sociologists in the First Person* is the first book to survey the Canadian sociological imagination through personal recollections. Exploring the lives and experiences of twenty contributors from across the country, this book connects the unique and shared features of their careers to broad social dynamics while providing a guide to their own research and administrative contributions to their universities, their profession, and their broader society and communities. The contributors, who teach in different types of institutions, are prominent in the discipline and in their specializations, and represent significant and diverse intellectual currents, political perspectives, and life and career experiences. Aiming to start a broad conversation about what social science and the academic profession look like in Canada from an insider's perspective, *Canadian Sociologists in the First Person* offers invaluable lessons for younger scholars as they envision a diverse sociological imagination for the twenty-first century.

Death Penalty Mitigation Jose B. Ashford, Melissa Kupferberg, 2013-08-08 This book provides an introduction to socio-legal forms of mitigation in capital sentencing. It helps mitigation specialists, defense investigators, social scientists, and lawyers in developing socio-cultural themes of mitigation. It examines scientific formulations, concepts, and frameworks for structuring social history investigations and assessments of moral culpability. A fundamental aim of this handbook was to provide mitigation professionals not only with an understanding of the context of mitigation in criminal justice thinking but also ways of contextualizing issues of blame and culpability. Cases are used to illustrate how to identify, evaluate, and present mitigation evidence in assessing issues of culpability in the mitigation of punishment in death penalty cases. It also exposes mitigation professionals to recent developments in the social sciences with implications for assessing issues of practical rationality, diminished volition, unfortunate forms of socialization, criminal propensities, socio-cultural deprivation, and gang involvement. These topics are linked with legal and philosophical conceptions of moral culpability that offer mitigation professionals new ways of thinking about both proximal and remote forms of mitigation. These socially oriented lenses used in examining these concepts and legal issues offer alternative ways of thinking about issues of capacity, choice, and character in assessing diminished forms of moral culpability. The book concludes with recommendations for future research and other strategies for promoting the improvement of practice in the field of capital mitigation. Unlike other books on death penalty mitigation, this book examines

issues of relevance to social scientists as well as mental health professionals In fact it is one of the only books written on the subject that includes opportunities for the inclusion of expert testimony on socio legal matters by social criminologists sociologists social psychologists and social workers

The Biopolitics of Lifestyle Christopher Mayes, 2015-12-22 A growing sense of urgency over obesity at the national and international level has led to a proliferation of medical and non medical interventions into the daily lives of individuals and populations This work focuses on the biopolitical use of lifestyle to govern individual choice and secure population health from the threat of obesity The characterization of obesity as a threat to society caused by the cumulative effect of individual lifestyles has led to the politicization of daily choices habits and practices as potential threats This book critically examines these unquestioned assumptions about obesity and lifestyle and their relation to wider debates surrounding neoliberal governmentality biopolitical regulation of populations discipline of bodies and the possibility of community resistance The rationale for this book follows Michel Foucault's approach of problematization addressing the way lifestyle is problematized as a biopolitical domain in neoliberal societies Mayes argues that in response to the threat of obesity lifestyle has emerged as a network of disparate knowledges relations and practices through which individuals are governed toward the security of the population's health Although a central focus is government health campaigns this volume demonstrates that the network of lifestyle emanates from a variety of overlapping domains and disciplines including public health clinical medicine media entertainment school programs advertising sociology and ethics This book offers a timely critique of the continued interventions into the lives of individuals and communities by government agencies private industries medical and non medical experts in the name of health and population security and will be of interests to students and scholars of critical international relations theory health and bioethics and governmentality studies
