De Vos, 1994-01-01 Framing Decisions J. Davidson Frame, 2012-11-19

The economic crisis of 2008-2009 was a transformational event; it demonstrated that smart people aren't as smart as they and the public think. The crisis arose because a lot of highly educated people in high impact positions—political power brokers, business leaders, and large segments of the general public—made a lot of bad decisions despite unprecedented access to data, highly sophisticated decision support systems, methodological advances in the decision sciences, and guidance from highly experienced experts. How could we get things so wrong? The answer, says J. Davidson Frame in *Framing Decisions: Decision Making That Accounts for Irrationality, People, and Constraints*, is that traditional processes do not account for the three critical, immeasurable elements highlighted in the book's subtitle: irrationality, people, and constraints. Frame argues that decision makers need to move beyond their single-minded focus on rational and optimal solutions as preached by the traditional paradigm. They must accommodate a decision's social space and address the realities of dissimulation, incompetence, legacy, greed, peer pressure, and conflict. In the final analysis, when making decisions of consequence, they should focus on people both as individuals and in groups. *Framing Decisions* offers a new approach to decision making that gets decision makers to put people and social context at the heart of the decision process. It offers guidance on how to make decisions in a real world filled with real people seeking real solutions to their problems.

Smart Economic Decision-Making in a Complex World Morris Altman, 2020-05-22

Smart Economic Decision Making in a Complex World is a fresh and reality-based perspective on decision making with significant implications for analysis, self-understanding, and policy. The book examines the conditions under which smart people generate outcomes that improve their place of work, their household, and society. Within this work, the curious reader will find interesting open questions on many fascinating areas of current economic debate, including the role of realistic assumptions, robust model building, understanding how and when non-neoclassical behavior is best practice, why the assumption of smart decision makers is best to understand and explain our economies and societies, and under what conditions individuals can make the best possible choices for themselves and society at large. Additional sections cover when and how efficiency is achieved, why inefficiencies can persist, when and how consumer welfare is maximized, and what benchmarks should be used to determine efficiency and rationality. Makes the case for smart and rational decision making as a context-dependent, rational process that is framed by socio-cultural environment and conditioned by institutional capacities. Explains how incorporation of the smart decision maker concept into economic thought improves our understanding of how, why, and when people generate certain outcomes. Explores how economic efficiency can be achieved, individual preferences realized, and social welfare maximized through the use of smart and rational approaches.
