Choosing Assisted Reproduction Social Emotional Ethical Considerations:

Choosing Assisted Reproduction Susan Cooper, Ellen Sarasohn Glazer, 1998 Here authors who have been involved in the support and education of infertile couples for many years explore in compelling detail the medical legal ethical and psychological implications of assisted reproductive technology ART The first part of the book explains the alphabet of treatments IVF GIFT ZIFT and ICSI with a minimum of technical language also covering pregnancy after ART and pregnancy loss The second part looks in detail at third party parenting options sperm donation ovum donation surrogacy gestational care and embryo donation *Planning Parenthood* Rebecca A. Clark, 2009-06 Aims to guide prospective parents through the complicated mazes of assisted reproduction and adoption This work describes fertility assistance surrogacy and adoption clearly outlining the requirements of each strategy It compares the medical emotional financial and legal investments and risks involved with each of these options *Genetics* Thomas A. Shannon, 2005-01-20 Over a decade ago the field of bioethics was established in response to the increased control over the design of living organisms afforded by both medical genetics and biotechnology Since its introduction bioethics has become established as an academic discipline with journals and professional societies is covered regularly in the media and affects people everyday around the globe In response to the increasing need for information about medical genetics and biotechnology as well as the ethical issues these fields raise Sheed Ward proudly presents the Readings in Bioethics Series Edited by Thomas A Shannon the series provides anthologies of critical essays and reflections by leading ethicists in four pivotal areas reproductive technologies genetic technologies death and dying and health care policy The goal of this series is twofold first to provide a set of readers on thematic topics for introductory or survey courses in bioethics or for courses with a particular theme or time limitation Second each of the readers in this series is designed to help students focus more thoroughly and effectively on specific topics that flesh out the ethical issues at the core of bioethics The series is also highly accessible to general readers interested in bioethics This volume collects critical essays by leading scholars on issues in biotechnology genetic counseling and the disabled population screening race based gamete selection stem cell research reproductive freedom and preimplantation diagnosis procreation for organ and tissue procurement and other critical areas where moral and ethical dilemmas are emerging from new and existing practices policy and legislation Adoption and Assisted Reproduction Madelyn Freundlich, 2001 The controversies in adoption have extended across a spectrum of policy and practice issues and although the issues have become clear resolution has not been achieved nor has consensus developed regarding a framework on which to improve the quality of adoption policy and practice This book is the fourth in a series to use an ethics based framework for analyzing and resolving these complex challenges in adoption while avoiding the divisiveness that has heretofore impeded their resolution This book raises the question of whether assisted reproduction including sperm donation egg donation and embryo transfer which may result in a child who is not genetically related to one or both parents creates a situation that is analogous to adoption The

book examines whether the knowledge acquired in the field of adoption should be applied in the area of assisted reproduction and whether issues in adoption such as identity access to background information and search are equally applicable in the context of reproductive technology The chapters are 1 Infertility Assisted Reproduction and Adoption 2 The Meaning of Parenthood in Assisted Reproduction and Adoption 3 The Parties Served through Adoption and Assisted Reproduction 4 Anonymity and Information Access 5 Market Forces in Adoption and Assisted Reproduction 6 Embryo Donation and Adoption and 7 The Law of Adoption and Assisted Reproduction The concluding chapter notes that the limited research in assisted reproduction has made it difficult to determine the relative risks and benefits of a number of aspects of current practice and that identifying the key issues can serve as a first step toward full discussion of the challenges faced by professionals in adoption and assisted reproduction Contains 181 references KB **Read Two Books and Let's Talk Next Week** Janice Maidman Joshua, Donna DiMenna, 2000 A complete guide to more than 300 of the best reading resources for use in your practice Bibliotherapy can be a valuable adjunct to virtually any psychotherapeutic approach Recommending books that focus on your clients core problem issues helps them see that they are not alone in their suffering It also may help them more rapidly gain insight and a more realistic sense of control regarding their situation And by extending the therapeutic process beyond the therapist s office bibliotherapy functions as a valuable cost containment strategy But with thousands of self help titles to choose from how do you separate the wheat from the chaff and find the best match between client and book Read Two Books and Let s Talk Next Week provides you with the detailed information you ll need to confidently navigate the vast ever growing sea of self help literature Organized by nineteen major presenting problems it features reviews of more than 300 of the best self help books published over the past thirty years Each summary includes A concise synopsis detailing the book s main subject area and its author s approach A description of the three major client groups for whom the book is appropriate Five main therapeutic insights readers may gain by reading the book Complete publishing information to facilitate easy access **The Publishers Weekly** ,1998 **Library Journal** ,1998-05 *The Library Journal* ,1998-04 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately *Ethical Considerations of Assisted Reproductive Technologies* American Fertility Society.
