**Choosing Personal Control in an Out-of-Control Society** Harold M. Alford,2000      The Globalization of Addiction Bruce Alexander,2010-03-04 Addiction is increasing all around the world and the conventional remedies don t work The Globalization of Addiction argues that the cause of this failure to control addiction is that past treatments have focused too single mindedly on the afflicted individual addict This book presents a radical rethink about the nature of addiction

**Choice, Control and Contemporary Childbirth** Julie Jomeen,2010 Explores the narrative childbirth experiences of a group of women illustrating how maternity choices are simulataneously promised and constrained      *You Can Choose to be Happy* Tom G. Stevens PhD,2010-04-05 Dr Stevens research identifies specific learnable beliefs and skills not general inherited traits that cause people to be happy and successful      *The Globalization of Addiction* Bruce K. Alexander,2008-07-03 The Globalization of Addiction presents a radical rethink about the nature of addiction Scientific medicine has failed when it comes to addiction There are no reliable methods to cure it prevent it or take the pain out of it There is no durable consensus on what addiction is what causes it or what should be done about it Meanwhile it continues to increase around the world This book argues that the cause of this failure to control addiction is that the conventional wisdom of the 19th and 20th centuries focused too single mindedly on the afflicted individual addict Although addiction obviously manifests itself in individual cases its prevalence differs dramatically between societies For example it can be quite rare in a society for centuries and then become common when a tribal culture is destroyed or a highly developed civilization collapses When addiction becomes commonplace in a society people become addicted not only to alcohol and drugs but to a thousand other destructive pursuits money power dysfunctional relationships or video games A social perspective on addiction does not deny individual differences in vulnerability to addiction but it removes them from the foreground of attention because social determinants are more powerful This book shows that the social circumstances that spread addiction in a conquered tribe or a falling civilisation are also built into today s globalizing free market society A free market society is magnificently productive but it subjects people to irresistible pressures towards individualism and competition tearing rich and poor alike from the close social and spiritual ties that normally constitute human life People adapt to their dislocation by finding the best substitutes for a sustaining social and spiritual life that they can and addiction serves this function all too well The book argues that the most effective response to a growing addiction problem is a social and political one rather than an individual one Such a solution would not put the doctors psychologists social workers policemen and priests out of work but it would incorporate their practices in a larger social project The project is to reshape society with enough force and imagination to enable people to find social integration and meaning in everyday life Then great numbers of them would not need to fill their inner void with addictions      *Encounter* Stephen Spender,Irving Kristol,1973      **Encounter** ,1973      *Harvard Business Review* ,2006      **Cancer Survivorship** Patricia A. Ganz,2007-07-28 ancer survivors have increased in number more than

threefold over the last 30 years to the current level of 10 million and growing. Among patients diagnosed today, nearly two thirds are expected to survive 5 or more years. This success may be attributed to the expertise of physicians and nurses from multiple disciplines who precisely execute a complex plan based in clinical research. Yet after a period of orchestrated and frequent interaction with healthcare professionals bolstered by the attention and encouragement of family and friends, the cancer patient may view the end of treatment with anxiety and concern. And what exactly is the plan? Just as healthcare providers are expected to keep up to date with the latest in treatment and prevention, they must now coordinate and provide comprehensive survivor care. This significant text, organized and edited by Patricia A. Ganz and involving the contributions of over 40 distinguished authors, provides a greatly needed resource for survivor care today and tomorrow. The current attention on cancer survivorship represents a consequence of burgeoning survivor numbers, a corpus of data on late treatment effects in children and adults, and increased public and professional awareness. Dr. Ganz and many of the contributors to this comprehensive text pioneered cancer survivorship, and they must justifiably be proud that their advocacy and commitment to survivor care and research have resulted in in-depth reports by the President's Cancer Panel, several Institute of Medicine studies, and this timely text.
