Choosing To Co Operate:

Choice Computing: Machine Learning and Systemic Economics for Choosing Parag Kulkarni, 2022-08-28 This book presents thoughts and pathways to build revolutionary machine learning models with the new paradigm of machine learning to adapt behaviorism. It focuses on two aspects: one focuses on architecting a choice process to lead users on the certain choice path while the second focuses on developing machine learning models based on choice paradigm. This book is divided in three parts where part one deals with human choice and choice architecting models with stories of choice architects. Second part closely studies human choosing models and deliberates on developing machine learning models based on the human choice paradigm. Third part takes you further to look at machine learning based choice architecture. The proposed pioneering choice based paradigm for machine learning presented in the book will help readers to develop products help readers to solve problems in a more humanish way and to negotiate with uncertainty in a more graceful but in an objective way. It will help to create unprecedented value for business and society. Further it will unveil a new paradigm for modern intelligent businesses to embark on the new journey the journey of transition from shackled feature rich and choice poor systems to feature flexible and choice rich natural behaviors.

Organizing for Policy Influence

Benjamin Farrer, 2017-08-09 In this book Benjamin Farrer explains how activists can influence the policies they care about even when they are outnumbered and their issues are ignored. The solution lies in a surprising place: organizational choice. Different types of organizations will be more influential under particular democratic institutions. If they choose the optimal type of organization given their institutional context then even minority groups can be influential. Environmentalists are a key example of how small groups can sometimes punch above their weight. Environmentalists in different countries have made different organizational choices. These choices explain whether or not they succeeded in influencing policy. In the empirical chapters that follow Farrer shows that environmentalists can sometimes be more influential if they form interest groups but under other institutions political parties are the optimal organizational choice. Although interest groups are often easier to create national institutions can sometimes insulate mainstream politicians from niche interest groups. When institutions deny access to interest groups activists are forced to send the stronger signal of party entry. Using a variety of methods including a formal model, an experiment and a wealth of empirical data from a variety of settings Farrer proves that this theory of organizational choice adds to our understanding of several crucial phenomena. First it helps explain patterns of political participation by showing the importance of instrumental rather than purely expressive motivations for activism. Second it provides an important modification to Duverger's 1954 law by showing that new party entry is a function not only of electoral rules but also of the rules that govern interest groups. Third it extends research on the role of institutions in determining policy outputs by showing that policy outcomes are a function of the interaction between organizational choices and institutional context.
