Choosing A College Major Humanities:

Choosing a College Major Leon C. Karel, 1980 *Major Decisions* Laurie Grobman, E. Michele Ramsey, 2020-03-13 A practical how to guide for students and a powerful reminder of the value of a humanities education In recent decades the humanities have struggled to justify themselves in the American university The costs of attending a four year college have exploded resulting in intense pressure on students to major in STEM science technology engineering and mathematics business and other pre professional or practical majors that supposedly transmit more marketable skills than can be acquired from the humanities But as Laurie Grobman and E Michele Ramsey argue this vision of humanities majors idly pondering the meaning of life for four years is inaccurate *Major Decisions* demonstrates how choosing a major in the humanities is a worthwhile investment in a global economy that is shifting in the direction of college graduates who think broadly critically and ethically Indeed the core skills and knowledge imparted by an education in the humanities including facility with written and verbal communication collaboration problem solving technological literacy ethics leadership and an understanding of the human impacts of globalization are immensely useful to employers across a variety of sectors *Major Decisions* serves as a deeply informative guide to students and parents and provides a powerful reminder to employers and university administrators of the true value of an education in the humanities Strengthening the Middle Class United States. Congress. House. Committee on Education and Labor, 2007 *Selecting a College Major* Virginia N. Gordon, Susan Jones Sears, 2004 This innovative text simplifies the process of choosing a major from a sometimes overwhelming array of majors and related career fields It will assist not only the undecided student with selecting a major but also the major changer who is exploring alternative options A step by step process leads students through personal and academic assessment as well as occupational information searches Through thought provoking activities they can explore their academic career and personal interests and goals Students can investigate academic majors from many perspectives including a search of majors in general majors on their campus and majors based on their academic and occupational interests Highlights of this text include A Natural Decision Making Progression Students are directly and personally involved in activities that involve exploration reflection and choice Extensive Major Exploration Three distinct approaches help students narrow their List to realistic alternatives Incorporation of Academic and Career Interests Abilities and Values Self assessment gives students information on which to base their choice of a major Formulation of a Graduation Plan Students use their academic transcripts to summarize all they have Learned and develop a plan for the future *Major Trade-Offs* Corey Moss-Pech, 2025-05-06 An eye opening look at the relationship between students majors and their entry level jobs Humanities majors are used to answering the question So what are you going to do with that degree The common misconception is that students in humanities programs don t learn any useful skills for the real world In *Major Trade Offs* sociologist Corey Moss Pech argues that not only do humanities majors learn real world skills but they actually use them when they graduate Despite this discrepancy

graduates with so called practical degrees like business and engineering are much more likely to find employment and they earn higher salaries Why do we belittle a liberal arts education despite the valuable skills that students acquire during their studies Major Trade Offs addresses this question by following students from different majors as they enter the workforce To understand the relationship between majors and entry level jobs Moss Pech conducted nearly 200 interviews with roughly ninety students from four majors at a large Midwestern university engineering business English and communications He follows these students through their senior years chronicling their internships and the support their universities provide in helping them pursue their career paths He found that graduates from practical majors entered the labor market successfully typically through structured internship programs However many ended up in entry level jobs that while well paid were largely clerical and didn't necessarily require a degree to perform On the other hand liberal arts majors rarely accessed structured internships and were largely left to carve out their own paths but did use their degree skills once they secured a job These results challenge popular myths about the marketability of these different majors and offer a new vision for the future of higher education Liberal arts skills are essential in the labor market and yet educators and policymakers still push resources into the practical arts perpetuating the myth that those majors are more valuable while depriving students of a well rounded education and leaving them no better prepared for the workforce than liberal arts students Of interest to students educators and employers Major Trade Offs calls on colleges and universities to advocate for liberal arts majors leveling the playing field for students as they plan for entry level work *Confirmation Hearing on the Nomination of John G. Roberts, Jr. to be Chief Justice of the United States* United States. Congress. Senate. Committee on the Judiciary, 2005

Strategic, Policy and Social Innovation for a Post-Industrial Korea Joon Nak Choi, Yong Suk Lee, Gi-Wook Shin, 2018-05-23 Export oriented industrialization has transformed the Korean economy so profoundly that it has become known as the Miracle on the Han Yet this industrial model has become fragile as Korea's chaebols are being challenged by Chinese competitors Attempts to seek out new engines of economic growth have failed or remain underdeveloped while a looming demographic crisis threatens to exacerbate Korea's problems This book outlines a blueprint for overcoming these challenges moving beyond the business strategies government policies and socio cultural patterns established under export oriented industrialization Written by a stellar line up of international contributors its central proposition is that social change is needed to support the strategic and operational transformation of the chaebol and SMEs Specifically it stresses the need for an appreciation of the gender national and ethnic diversity emerging within the Korean workplace today If properly leveraged such diversity has the potential to reduce the groupthink that hampers the creativity and responsiveness of Korean firms today as well as facilitating greater success in overseas markets Taking an interdisciplinary approach this book will be useful to students and scholars in Korean Studies as well as those studying business economics and sociology more broadly in East Asia **How to Choose a College Major** Linda Landis Andrews, 2006 Gives guidance on how to discover skills
