Lang, 2010 This textbook introduces social work practice with socially unskilled populations or persons who lack social competence and whose group life is likely to be chaotic or nonexistent unless professionally assisted providing guidelines for working with these socially disabled persons in group settings The author outlines the unique pre group processes of socially unskilled populations and provides a methodology for advancing social competence She also identifies the professional and agency requirements for working with pre social processes A-Z of Groups and Groupwork Mark Doel, Timothy Kelly, 2013-11-28 Launching Palgrave's new interdisciplinary Professional Keywords series this reader friendly reference guide distils the vast field of groupwork study and practice into digestible yet authoritative chunks With over 60 alphabetized entries it is the perfect introduction to groupwork for health and social care practice *Handbook of Social Work with Groups* Charles D.

Garvin, Lorraine M. Gutiérrez, Maeda J. Galinsky, 2017-05-16 This definitive text now revised and expanded has introduced thousands of students and practitioners to the theory and practice of social work with groups. Leading authorities outline major models of group work and address critical issues in planning, implementing and evaluating interventions. The Handbook describes applications in all the major practice settings: mental health, prevention, child welfare, substance abuse, health care, aging, corrections, and more, as well as organizational and community settings. A strong focus on empowerment, social justice, and diversity is woven throughout. The empirical foundations of group work are reviewed and innovative research methods discussed. New to This Edition: Incorporates over a decade of advances in the field. Heightened focus on practitioner-researcher collaboration. Two chapters on substance abuse prevention with youth. Chapters on social justice, work evidence-based practice, offender reentry, intimate partner violence, intergroup dialogue, working with immigrants and refugees, qualitative methods, and intervention research. Major updates on existing topics such as cognitive behavioral group work, psychoeducational groups, health care settings, and technology-mediated groups. Integrative epilogue that synthesizes key themes.

Using Groupwork Mark Doel, 2006 Written by an experienced groupworker and academic, this book promotes greater knowledge and understanding of groupwork and group processes, particularly in social work and social care settings. Incorporating both theory and practice, it provides a practical guide to those considering groupwork and further inspiration for those already involved. The book incorporates a number of case examples of groups run in mainstream social work, social care, and multidisciplinary settings. Skills-based in approach, this original text includes illustrative group examples, quotes from groupworkers, key learning points based on research activities to develop practice suggestions for further reading. Published in association with *Community Care Magazine*, the book meets the changing needs of today's students and practitioners in social care and is a welcome addition to the current literature.

Foundations of Social Work Practice Mark A. Mattaini, Christine T. Lowery, 2002 In this iteration, date unspecified for the previous seven professors of social work from New York to Alaska, expand their emphasis on social justice, empowerment, and the moral core of the profession, in covering contemporary issues including an ecosystems approach, aging, disabilities, human rights.

Ripples Oded Manor, 2000 The answer depends to some extent on the work setting you have in mind. In *Ripples*, leading groupworkers introduce you to eleven applications. Assuming little prior knowledge, each tells you of the clients/users' needs, the methods used, and the ideas that guide workers in one setting. Further reading is suggested. Initiated by the interdisciplinary journal *Groupwork*, *Ripples* invites workers to learn from one another in the belief that the ripples of shared learning can only strengthen groupwork practice. The settings include personal growth, palliative care, occupational therapy, criminal justice, social work, mental health, health promotion, schools, community-based learning for adults, community development, and social action.

Richard Fria, 2005-04-08 The negotiated contract method for RFPs is a rapidly growing trend in construction Traditionally RFPs have gone through a competitive bid method meaning that 100% of the design work is done without the input of contractors and with very little real cost information With the negotiated contract method only about 10% of the design work is done before a contractor is brought to the table which means less paperwork and lower up front costs There are several advantages to the negotiated contract method Because only a small part of the design work is done up front before a contractor is brought on board no extensive re design work has to be done when budget schedule issues with the design become a factor A complete team architect designer and contractor is assembled earlier making for a much more efficient process and outcome The RFP process becomes a collaborative effort rather than a competitive one There is no other book on the shelf that either focuses specifically on RFPs in the construction industry or features a step by step method for implementing the negotiated contract method This is a step by step guide for managing the RFP process in a way that saves time money enhances team collaboration and assures quality in construction Focusing on the negotiated contract method as opposed to the competitive bid method the book takes readers from articulating the needs wish list for a construction project to the analysis of responses and interviews through negotiations and finalization of the deal This is a roadmap for Preparing understanding and assessing the quality of information in an RFP Gathering critical project specific information from free and up to date local databases Adding value to the process by assisting consultants in marketing and project management capabilities Selecting and working with a team early in the process to stay on schedule and on budget Improving the materials selection process and the end result overall quality of construction Example and template forms make it easy to
