## **Choosing Schools Consumer Choice And The Quality Of American Schools:**

**Choosing Schools** Mark Schneider, Paul Teske, Melissa Marschall, 2021-02-09 School choice seeks to create a competitive arena in which public schools will attain academic excellence encourage individual student performance and achieve social balance In debating the feasibility of this market approach to improving school systems analysts have focused primarily on schools as suppliers of education but an important question remains Will parents be able to function as smart consumers on behalf of their children Here a highly respected team of social scientists provides extensive empirical evidence on how parents currently do make these choices Drawn from four different types of school districts in New York City and suburban New Jersey their findings not only stress the importance of parental decision making and involvement to school performance but also clarify the issues of school choice in ways that bring much needed balance to the ongoing debate The authors analyze what parents value in education how much they know about schools how well they can match what they say they want in schools with what their children get how satisfied they are with their children's schools and how their involvement in the schools is affected by the opportunity to choose They discover most notably that low income parents value education as much as if not more than high income parents but do not have access to the same quality of school information This problem comes under sensitive thorough scrutiny as do a host of other important topics from school performance to segregation to children at risk of being left behind *School Choice: Separating Fact from Fiction* Patrick J.

Wolf, 2020-05-21 School choice is a hot topic in the United States Private school vouchers public charter schools open enrollment and homeschooling all regularly appear on the policy agenda as ways to improve the educational experience and outcomes for students parents and the broader society Pundits often make claims about the various ways in which parents select schools and thus customize their child's education What claims about school choice are grounded in actual evidence This book presents systematic reviews of the social science research regarding critical aspects of parental school choice How do parents choose schools and what do they seek What effects do their choices have on the racial integration of schools and the performance of the schools that serve non choosing students What features of public charter schools are related to higher student test scores What effects does school choice have on important non cognitive outcomes including parent satisfaction student character traits and how far students go in school What do we know about homeschooling as a school choice This book originally published as a special issue of the *Journal of School Choice* provides evidence based answers to those vital questions *Schools, Vouchers, and the American Public* Terry M. Moe, 2004-05-13 Moe's new book is not an argument for

or against vouchers it is an analysis of public opinion on vouchers that is likely to be very influential in shaping the movement's future Moe has written a nuanced and thoughtful treatise that goes beneath the notoriously unreliable single shot question favored by the media Do you favor or oppose school vouchers Richard D Kahlenberg in *The Nation* In a brilliant definitive analysis of the subject Terry Moe tells us who does and does not like vouchers as well as who says they will use them if the

opportunity arises He illuminates not only the school choice debate but the nature of public opinion more generally Paul E Peterson Harvard University No book tells us more about how Americans evaluate schools This book will be the starting point for anyone interested in any school reform not just vouchers A model analysis of public opinion on a public policy Samuel Popkin University of California San Diego Finally a book on school vouchers that explores what ordinary Americans want and believe when thoughtfully engaged on the issue Stephen D Sugarman University of California

**New and Better Schools** Michael Q. McShane,2014-12-05 In the past decade the number of students enrolled in private school choice programs has grown ten fold But granting students access to public financing for their private education has not led to the vibrant marketplace of school options many of its supporters envisioned If school choice policy is to improve the American education landscape careful thought must be put in to understand how it can expand existing high quality schools and create new high quality schools to serve more children New and Better Schools attacks this problem from the perspective of both researchers and practitioners documenting the hurdles entrepreneurial school leaders face and offering a way forward
