Chora 2 Intervals In The Philosophy Of Architecture:

Chora 2 Alberto Pérez-Gómez, Stephen Parcell, 1996-09-19 Karsten Harries provides a new and long overdue reading of Martin Heidegger's well known essay *Building Dwelling Thinking* Donald Kunze and Stephen Parcell consider possibilities of meaningful architectural space for a visual culture continuing themes they addressed in *Chora 1* Further reflections on the spaces of literature cinema and architecture include an interview with French writer and film maker Alain Robbe Grillet and articles by Dagmar Motycka Weston on the surrealist city Tracey Eve Winton on the museum as a paradigmatic modern building and Terrance Galvin on spiritual space in the works of Jean Cocteau Jean Pierre Chupin and Bram Ratner explore historical themes in their essays on French Renaissance architect Philibert de l'Orme and the Jewish myth of the Golem Gregory Caicco addresses ethical questions in his essay on the Greek agora and the death of Socrates as does Lily Chi in her meditation on the critical issue of use in architectural works A concern with architectural representation and generative strategies for the making of architecture is present throughout especially in the essay by Joanna Merwood on the provocative *House* by British artist Rachel Whiteread

Chora Stephen Parcell, Alberto Pérez Gómez, 1996 *Chora : Intervals in the Philosophy of Architecture* Stephen Parcell, Alberto Perez-Gomez, 1999 **The Material Imagination** Matthew Mindrup, 2016-03-03 In recent years architectural discourse has witnessed a renewed interest in materiality under the guise of such familiar tropes as material honesty form finding or digital materiality Motivated in part by the development of new materials and an increasing integration of designers in fabricating architecture a proliferation of recent publications from both practice and academia explore the pragmatics of materiality and its role as a protagonist of architectural form Yet as the ethos of material pragmatism gains more popularity theorizations about the poetic imagination of architecture continue to recede Compared to an emphasis on the design of visual form in architectural practice the material imagination is employed when the architect thinks matter dreams in it lives in it or in other words materializes the imaginary As an alternative to a formal approach in architectural design this book challenges readers to rethink the reverie of materials in architecture through an examination of historical precedent architectural practice literary sources philosophical analyses and everyday experience Focusing on matter as the premise of an architect's imagination each chapter identifies and graphically illustrates how material imagination defines the conceptual premises for making architecture

Analogical Thinking in Architecture Jean-Pierre Chupin, 2023-07-27 This book provides an in depth exploration of the rich and persistent use of analogical thinking in the built environment Since the turn of the 21st century design thinking has permeated many fields outside of the design disciplines It is expected to succeed whenever disciplinary boundaries need to be transcended in order to think outside the box This book argues that these qualities have long been supported by analogical thinking an agile way of reasoning in which think the unknown through the familiar The book is organized into four case studies the first reviews analogical models that have been at the heart of design thinking representations from the 1960s to the present day the

second investigates the staying power of biological analogies the third explores the paradoxical imaginary of analogous cities as a means of integrating contemporary architecture with heritage contexts while the fourth unpacks the critical and theoretical potential of linguistic metaphors and visual comparisons in architectural discourse Comparing views on the role of analogies and metaphors by prominent voices in architecture and related disciplines from the 17th century to the present the book shows how the analogical world of the project is revealed as a wide open field of creative and cognitive interactions These visual and textual operations are explained through 36 analogical plates which can be read as an inter text demonstrating how analogy has the power to reconcile design and theories

Chora 5 Alberto Pérez-Gomez, Stephen Parcell, 2007-07-10 Provocative views on why architecture matters offer vital information for developing a richer architecture

IMAGINARIES ON MATTER: TOOLS, MATERIALS, ORIGINS Thomas Bo Jensen, Carolina Dayer, Jonathan Foote, 2023-11-21 Imaginaries on Matter Tools Materials Origins promotes an innovative architectural research agenda that connects historical cultural written research with digitally led material explorations The common thread is the notion of the material imagination disclosed in the reverie or material daydream which challenges overly pragmatic or unreflective material choices within current architectural practice In bonding our imagination directly with matter while also confronting new technologies this book promotes strategies by which architects and builders future relations with materials can stay rooted within the deeper concerns of cultural meaning Imaginaries on Matter includes interviews with Aulets Architectes Alibi Studio Ensamble Studio Geometria Helen Hard Kieran Timberlake Supermanoeuvre and Vandkunsten as well as a postscript by David Leatherbarrow Edited by Thomas Bo Jensen Carolina Dayer Jonathan Foote
