AlphaGo Simplified Mark Liu, 2024-08-27 May 11 1997 was a watershed moment in the history of artificial intelligence AI the IBM supercomputer chess engine Deep Blue beat the world Chess champion Garry Kasparov It was the first time a machine had triumphed over a human player in a Chess tournament Fast forward 19 years to May 9 2016 DeepMind's AlphaGo beat the world Go champion Lee Sedol AI again stole the spotlight and generated a media frenzy This time a new type of AI algorithm namely machine learning ML was the driving force behind the game strategies What exactly is ML How is it related to AI Why is deep learning DL so popular these days This book explains how traditional rule based AI and ML work and how they can be implemented in everyday games such as Last Coin Standing Tic Tac Toe or Connect Four Game rules in these three games are easy to implement As a result readers will learn rule based AI deep reinforcement learning and more importantly how to combine the two to create powerful game strategies the whole is indeed greater than the sum of its parts without getting bogged down in complicated game rules Implementing rule based AI and ML in these straightforward games is quick and not computationally intensive Consequently game strategies can be trained in mere minutes or hours without requiring GPU training or supercomputing facilities showcasing AI's ability to achieve superhuman performance in these games More importantly readers will gain a thorough understanding of the principles behind rule based AI such as the MiniMax algorithm alpha beta pruning and Monte Carlo Tree Search MCTS and how to integrate them with cutting edge ML techniques like convolutional neural networks and deep reinforcement learning to apply them in their own business fields and tackle real world challenges Written with clarity from the ground up this book appeals to both general readers and industry professionals who seek to learn about rule based AI and deep reinforcement learning as well as students and educators in computer science and programming courses *Annual Report on Reforms and Progress in Chosen (Korea)*. Korea, 1911 A Guide to English Grammar Bessie Brooks, 2012-02-17 There is elements of language that allow us to better understand the world Abstractions in language help us classify ideas into groups so that we may generalize or specify parts within a label For instance a car is made up of many parts such as the engine the wheels the body etc We call it a car instead of of an engine driving the wheels with a body attached to carry passengers to make it easier for us not only to transfer the thought within our mind but also to others Also by calling it a car we have differentiated the object from a train or a bike both being other modes of transportation Abstractions are part of our mental grids that help us by chopping reality into fragments so that we may organize it and put it into our grasp of understanding Something such as the temperature cannot be measured because it is infinitely variable It is just our environment reduced to numbers so that we can conceive it in our minds Again our world is divided into pieces so the human mind can understand it bit by bit From seeing a car to measuring the temperature language offers an explanation to our experience and it is a powerful tool to help us think An
