Christ And The Cosmos:

Jesus and the Cosmos Denis Edwards, 2004-07-22 At the end of the twentieth century we began to understand that the earth is vulnerable that it is like a tiny garden in space under threat on all sides Jesus and the Cosmos is an attempt to think theologically about the ecological crisis we face in the light of the great Christian tradition Our theological tradition has been shaped within the worldview of a static universe By contrast we are told today that the universe began with a cosmic explosion called the Big Bang that we live in an expanding universe with galaxies rushing away from us at an enormous rate that we human beings are part of an evolutionary movement on the earth and that we are intimately linked with the health of delicately balanced life systems on our planet Not only has modern science given this age a new cosmology but contemporary historical studies have provided us with a new approach to the historical Jesus Critical biblical study has allowed us to know far more about the Jesus who brought joy and liberation into people's lives In Jesus and the Cosmos Denis Edwards tells the story of the cosmos the story of Jesus of Nazareth and shows their connections Ultimately he will assert Jesus of Nazareth risen from the dead IS the dynamic power at the heart of the cosmic process *Christ and the Cosmos* Keith Ward, 2015-08-06 Keith Ward clarifies the Trinitarian doctrine in light of contemporary scientific thought offering a coherent wholly monotheistic interpretation of God *Apocalyptic Good News* R. Dean Drayton, 2019-07-12 Remarkable studies in the New Testament have recovered the fact that the gospel the good news of Jesus Christ was apocalyptic good news God's redemptive action within history Today for more and more people the sheer scope of an evolutionary universe renders life on Earth as utterly insignificant religion as nothing more than superstition And now in the Anthropocene we on the pale blue dot live in an apocalyptic age in which cataclysmic issue after cataclysmic issue threaten the future of the planet The faith of the early church was in an apocalyptic cosmic Christ unleashing within history God's good news of a new creation Set within the world as we now know it this gives meaning to the cosmos and life wherever it is found around any star Screened from view for over a millennium during mission to non apocalyptic cultures now is the time for a new paradigm for church the apocalyptic church for an apocalyptic age to replace the denominational church What a difference this makes to faith worship and the role of the church in an apocalyptic future **Christ and the Cosmos** E. H. Andrews, 1986 The evolutionary scenario for the origin of life is almost universally accepted and taught Yet against this stands the Christian contention for a biblical view of origins In this Professor Andrews last work he moves on from the basic evolution creation debate to examine our whole concept of the creationist position Can creationism be proved by scientific evidence Indeed how much weight should we give to scientific findings in relation to biblical teaching Professor Andrews contends that if our concept of the cosmos is to be a true one then the Christ of the Bible must be at the centre of our thinking Nay theory of origins whether scientific creationism or evolution that fails at this point is equally false Only in Christ the Creator and Sustainer of the universe can Christian faith find its ultimate and glorious fulfilment *Christ and the Cosmos* Gordon Strachan, 1985

Christ and the Cosmos Jean-François Bonnefoy, 1965 Christ and the Universe: Teilhard de Chardin and the Cosmos
Robert Hale (OSB.), Robert F. Hale, 1973 Based on the author's thesis Includes bibliographical references *The New Testament and the Future of the Cosmos* Ryan P. Juza, 2020-11-05 The New Testament and the Future of the Cosmos is an exploration into the cosmic eschatology of the New Testament It invites the reader to grapple with two interrelated questions along with the author 1 What did the writers of the New Testament teach about the fate of the cosmos and 2 can we synthesize their teachings into a coherent New Testament theology By offering a close reading of key texts that inform the topic most notably Matt 24 29 31 Mark 13 24 27 Luke 21 25 28 Rom 8 19 22 Heb 12 25 29 2 Pet 3 4 13 and Rev 21 1 5 it is argued that one can with certain qualifications ascertain a clear and coherent New Testament message pertaining to the future of the cosmos Along the way new exegetical ground is broken in several passages by identifying a previously unnoticed theme that runs throughout the New Testament concerning the future of the cosmos God's judgment of the heavenly powers of evil as a key component to the cosmic transition At present these hostile powers hold the cosmos captive to death but on the Day of the Lord they will be overthrown setting the stage for a materially transformed world to emerge from the hand of God *Prayers of the Cosmos* Neil Douglas-Klotz, 2010-12-14 When it was first published two decades ago Prayers of the Cosmos presented a radically different interpretation of Christ's message one that has since been supported by many scholars Author Neil Douglas Klotz a prominent authority on Middle Eastern mysticism argues that whatever Jesus said was said in Aramaic which implies an entirely different worldview than that of someone who spoke Greek or Latin This has a tremendous impact on any translation of Jesus's teachings and reveals a Christ who is a much more mystical cosmic spiritual leader than might be expected Newly re-released Prayers of the Cosmos will be a revelation for anyone seeking to expand their spiritual horizons Neil Douglas Klotz is the Sufi Founder of the worldwide network of the Dances of Universal Peace and co-chair of the Mysticism Group of the American Academy of Religion He is a world renowned scholar in religious studies spirituality and psychology There is no reason to stop at one single phrasing of what Jesus intended his words to mean they are so rich and resonant that they deserve to be spoken tasted rolled around in the mouth body and spirit savored and appreciated for their subtle flavors and rich spiritual nourishment New Dimensions *Cosmos and Revelation* Peter R. Stork, 2021-09-30 Science and technology have profoundly altered the cosmic and societal perceptions of the world Regrettably the Christian imagination has not kept pace Most believers still adhere to pre-scientific views Cosmos and Revelation urges the Christian community to reimagine God's creation by engaging the data of science For if God has indeed brought forth an intelligible world for us to explore through scientific research those who profess this faith ought to as a minimum allow scientific findings to expand their theological horizon Drawing on his scientific qualification and academic background in theology Peter R Stork opens several windows on God's creation from galactic star nurseries to the wonderland of living cells After rereading Genesis 1 and 2 the author interlaces examples and reflections to present a

coherent yet provocative sketch of the new landscape that spreads out before us leaving it to his readers to intuit for themselves the immensities Christians are challenged to embrace in the age of science

Cosmos Louis Bouyer, 1988 Louis Bouyer one of the 20th century giants of Catholic theology here addresses a breathtaking range of questions related to the world the history of origin studies from cosmogonic myth to philosophical cosmologies from magic to mysticism Science myth philosophy theology poetic experience and technology here constantly rub elbows Through it all he explores the insightfulness of Christian revelation penetrating the mystery as a reflection of the mystery of that other cosmos it reflects the inner being of God the creator Louis Bouyer is a priest theologian teacher and writer

Cosmic Jesus J. E. Brandenburg, 2014-01-21 Physicist Brandenburg gives us an explanation of the Cosmic Jesus and the metaphysics of the Bible and what it says about the cosmos Brandenburg reveals the relationship between GEM theory Gravity Electricity Magnetism and Gematria the importance of Israel being on the Silk Road the Aquarian Nazareth The Genesis Catastrophe The Revelation introduced the idea of a One God of Law who was master of all Physics and the Cosmos and lots more Brandenburg discusses the Greek philosopher Aristarchus of Samos 200 BC his work on the modern structure of the cosmos and his influence on the Biblical Paul who also had a companion named Aristarchus as well as how the Bible appears to contain a sophisticated mathematical allegory centered around Jesus and the 5th dimension of Kaluza Klein and GEM theory that runs through millennia where Jesus is the repairer of the effects of the collapse of the fifth dimension to subatomic size Brandenburg tells us how we must necessitate human contact and travel to the stars and establish trade in ideas and merchandise with those who dwell there We must be proactive in this and not wait for others to come here we must make every effort to go to them

Cosmos Reborn John Crowder, 2013-08-01 Take a grace centered look at regeneration the new creation and the new birth Christ cured the human condition John's new book explores the universal scope of the cross if one died for all then all died For God was in Christ reconciling the cosmos to Himself He has woven humanity into His divinity Dispel the myth of a dark schizophrenic god of religion This book makes a scandalous case that the Father of Jesus Christ is in a good mood Need a religious detox Have a dose of happy theology on the new creation Good news to liberate your life Though we opposed Him as enemies in our minds God never set Himself against us as our enemy Adam was breathed from the very life of God and it has always been the Creator's intent to restore humanity to the bliss and immortality of its divine origin In the incarnation death and resurrection of Jesus Christ God included you and absorbed the entire created order into Himself bringing an end to decay and corruption Mortality has been swallowed up by immortality

Circles and the Cross Loren Wilkinson, 2023-08-21 Circles and the Cross is an invitation to explore two mysteries One is the miracle of the cosmos why is there something and not nothing The other is the miracle of consciousness why should this collection of stardust be an I and not just an it Our basic response to those mysteries is wonder and from wonder have grown the three great trees of human culture religion art and science This

exploration is undertaken in the light of a third mystery the cross of Christ is the clearest picture we have of the triune Creator of both cosmos and consciousness That self emptying of the Creator out of love for the creation helps us understand the pleasures paradoxes and pains of science it helps us understand how evolution can be another name for creation it casts light on the Enlightenment and Romanticism In particular it illuminates the environmental movement an ethic in search of a religion Loren Wilkinson drawing on fifty years of teaching and writing about our relationship to creation invites you to join this journey into understanding how the cross of Christ sheds light on the mysteries that surround us and gives us hope in a difficult age

Christ and the Universe Robert Hale,1973 Creation and Cosmos - The Literal Values of Genesis Garrison Clifford Gibson,2012-11-27 There are many questions that intelligent people have about the Bible science and evolution theory Finding intelligent answers is difficult The problem is that specialization is required in the sciences in philosophy and theology so people tend to pick one and disregard the others There aren t so many people that consider all three fields with much depth of understanding I made a try at that and wrote a book that is free to download It is not only difficult to understand all three fields it is difficult to select what should be written about and difficult to write well I didn t by any means cover everything there is lots to cover

The Sacred Cosmos Terence L. Nichols,2009-01-07 In this careful and closely argued book Terence Nichols presents a vigorous challenge to naturalistic thinking We are offered the persuasive vision of a world of many leveled richness whose Creator is continually active within its unfolding history John Polkinghorne University of Cambridge This is a uniquely valuable work for our time The Sacred Cosmos takes on the ambitious task of a synthesis of the contributions of contemporary science basic Thomistic philosophy of being and the human person and basic themes of Christian theology on God creation and the relations between God and the world The author a theologian brings to his task an amazing background and range of competence both in contemporary science and Christian theology The most valuable part of the book is the author s powerful and cogent critique of the widely influential scientific naturalism of our day which claims the only reliable way of knowing is that of modern science and all that exists can be explained by the evolving interaction of material elements leaving no place for anything of the spiritual order like the human soul moral values or God W Norris Clarke S J Fordham University In this sensible and solid reply to scientific atheism or naturalism Nichols charts the way for a new harmony between science and spirituality I recommend it to anyone interested in the interaction of religion and science Alan Padgett author of *Science and the Study of God A Mutuality Model for Theology and Science*
