**Artificial Intelligence and the City** Federico

Cugurullo,Federico Caprotti,Matthew Cook,Andrew Karvonen,Pauline McGuirk,Simon Marvin,2023-12-01 This book explores in theory and practice how artificial intelligence AI intersects with and alters the city Drawing upon a range of urban disciplines and case studies the chapters reveal the multitude of repercussions that AI is having on urban society urban infrastructure urban governance urban planning and urban sustainability Contributors also examine how the city far from being a passive recipient of new technologies is influencing and reframing AI through subtle processes of co constitution The book advances three main contributions and arguments First it provides empirical evidence of the emergence of a post smart trajectory for cities in which new material and decision making capabilities are being assembled through multiple AIs Second

it stresses the importance of understanding the mutually constitutive relations between the new experiences enabled by AI technology and the urban context Third it engages with the concepts required to clarify the opaque relations that exist between AI and the city as well as how to make sense of these relations from a theoretical perspective Artificial Intelligence and the City offers a state of the art analysis and review of AI urbanism from its roots to its global emergence It cuts across several disciplines and will be a useful resource for undergraduates and postgraduates in the fields of urban studies urban planning geography architecture urban design science and technology studies sociology and politics

**Banking on (Artificial) Intelligence** Theodora Lau, 2025-02-12 There is no lack of hype around artificial intelligence We have only begun to scratch the surface of what this powerful technology can do While tech and financial services become more intertwined cutting through the noise has become more difficult but also more crucial As a technology AI is essential to advancing innovation to creating efficiencies and enhancing productivity while capturing opportunities by both incumbent financial institutions as well as fintechs But it also comes with risks and potential for biases and disinformation that can deepen inequalities and erode trust in our society Responsible innovation must become part of our DNA and not as an afterthought This book provides a tailored overview of what AI specifically means for financial services a highly regulated yet also disrupted industry It investigates the current state of AI applications in financial services today along with the state of funding and partnerships between tech and banking industries It also examines the key pillars of responsible AI and the importance of keeping humans in the loop The book takes a deep dive into the use cases in the financial services industry the challenges and opportunities and the fragmented regulatory landscape How can we effectively assess risks and balance innovation and customer centricity with trust in AI in financial services Can smaller organizations reap the benefits of the technology How can institutions deploy AI responsibly and securely and promote a fairer and more equitable future for more people While data is about bits and bytes the realities of AI is very much human This book will help spark dialogue and collaboration as we journey into the future
