The European Artificial Intelligence Act Vera Lúcia Raposo, 2025-10-27 The legal and regulatory landscape for artificial intelligence is shifting and this is the book that will equip you to navigate it with clarity and authority Gathering contributions from leading experts in the field this edited volume provides one of the first in depth examinations of the EU Artificial Intelligence Act AI Act in its final form It is not a mere commentary Rather it delivers a critical and structured analysis of how the AI Act will reconfigure the governance of digital technologies in Europe and beyond The chapters engage closely with the legal text unpacking its architecture regulatory logic and underlying normative choices Key elements of the framework ranging from high risk systems and prohibited practices to conformity assessments and the institutional role of national authorities are examined in detail with an eye to both doctrinal coherence and regulatory

practice. Importantly, the volume situates the AI Act within the broader EU legal landscape, exploring its intersection with instruments such as the General Data Protection Regulation, the Medical Devices Regulation, and other sector-specific regimes. In doing so, it exposes synergies, tensions, and unresolved questions that will shape implementation and enforcement. The analysis is not confined to the European context. Dedicated chapters on the approaches adopted in non-EU jurisdictions provide a comparative dimension, highlighting both shared concerns and diverging regulatory philosophies. The result is a richer understanding of where global AI governance may be heading and how fragmented or coordinated it might become. Designed for legal scholars, practitioners, regulators, and policy experts, this book is more than a reference; it is an indispensable guide to the law that will define Europe's approach to artificial intelligence for years to come.

Weichert, 2023-05-16 When COVID-19 erupted from Wuhan, China, under mysterious circumstances, the Communist Party of China covered up its existence for as long as possible. It is now apparent that there is more to COVID than what the authorities wish for us to know. [Biohacked: China's Race to Control Life](#) details the decades-long pursuit by the Chinese Communists to dominate the biotechnology industry to control the very building blocks of life on Earth to further their political control at home and their supremacy abroad. More appalling than the egregious cover-up that China's rulers engaged in with COVID-19 is the fact that Western scientists, pharmaceutical companies, and research labs have contributed to China's rapid and dangerous growth in the biotech industry so much so that China, not the United States, may become the seat of the biotechnology industry. The Chinese leadership believes that biotechnology is a critical industry for the Communist Party to achieve its China Dream of becoming the world's dominant superpower by 2049. In China's biotech sector, truly macabre practices are being developed, from ambitious cloning programs to the creation of potential pathogens that China's military plans to use in specific genetic attacks against Beijing's growing list of political enemies. To stop the threat, author Brandon J. Weichert proposes the world's nations create a comprehensive set of treaties for regulating biotechnology research and development. Further, Weichert calls for Washington to slow the transfer of advanced biotechnology knowledge and funding from the United States to China using means like the Foreign Corrupt Practices Act and the Committee on Foreign Investment in the United States (CFIUS). Unless an all-of-government-and-society approach is taken to curbing irresponsible biotech development in China, then another deadlier COVID-19-like pandemic could be at hand.
