The Voice Catchers Joseph Turow, 2021-05-18. Your voice as biometric data and how marketers are using it to manipulate you. Only three decades ago it was inconceivable that virtually entire populations would be carrying around wireless phones wherever they went or that people's exact locations could be tracked by those devices. We now take both for granted. Even just a decade ago the idea that individuals' voices could be used to identify and draw inferences about them as they shopped or interacted with retailers seemed like something out of a science fiction novel. Yet a new business sector is emerging to do exactly that. The first in-depth examination of the voice intelligence industry, *The Voice Catchers* exposes how artificial intelligence is enabling personalized marketing and discrimination through voice analysis. Amazon and Google have numerous patents pertaining to voice profiling, and even now their smart speakers are extracting and using voice prints for identification and more. Customer service centers are already approaching every caller based on what they conclude a caller's voice reveals about that person's emotions, sentiments, and personality, often in real time. In fact, many scientists believe that a person's weight, height, age, and race, not to mention any illnesses they may have, can also be identified from the sound of that individual's voice. Ultimately, not only marketers but also politicians and governments may use voice profiling to infer

personal characteristics for selfish interests and not for the benefit of a citizen or of society as a whole Leading communications scholar Joseph Turow places the voice intelligence industry in historical perspective explores its contemporary developments and offers a clarion call for regulating this rising surveillance regime **Why Are We Here?** Jennifer Moss,2025-01-21 A deeply human exploration of how our relationship with work has evolved and a guide for leaders who aim to make things right from the author of The Burnout Epidemic Work has recently undergone profound changes not all for the better AI s acceleration has led to worker fears and uncertainties around job security DEI initiatives are underfunded or canceled The debate over remote hybrid and in person work is growing more heated And study after study confirms a widespread sense of employee unhappiness in the workplace Workers are left to reexamine their relationship with work asking themselves Why are we here Workplace expert Jennifer Moss author of The Burnout Epidemic takes readers to the front lines of this historic shift Through extensive interviews she uncovers why work has changed and highlights the leaders and organizations who have managed to build cultures that everyone really wants Packed with fresh insights new research and compelling stories Why Are We Here illuminates this turbulent time and offers inspiration and practical guidance for leaders navigating our complex ever changing world **Directory of American Scholars: English speech and drama** ,1999 **Combined Membership List of the American Mathematical Society, Mathematical Association of America, and the Society for Industrial and Applied Mathematics** American Mathematical Society,2003 *International Who's Who of Professionals* Carrie J.
