The aim of the design process is to make the logo immediately recognizable. The logo is one aspect of the commercial brand of any company or even economic entity. From the font to the color, the aesthetic components of a logo hugely impact how customers perceive your company. Is it attractive enough, or does it repel them? Is it standing out, or simply fading into the background? Does it successfully identify your brand, or confusing enough to mix up with your competitors? During the research and design phase, these are all quality-critical questions to ask. Only a smattering of the main ingredients far from the only ones is needed to create a successful logo. Too many websites today are still inaccessible. In our new book, we have explored crafting the process for flexible design patterns and how to make accessible interfaces without extra effort. Check out this book for a complete list of specific and prosecutable tips and ideas to help you design the best possible logo for your brand.
