Garg, Neha Gupta, Mohini Agarwal, 2023-06-15 Business Analytics BA is an evolving phenomenon that showcases the increasing importance of using huge volumes of data to generate value for businesses. Advances in BA have offered great opportunities for organisations to improve, innovate and develop existing or new processes, products and services. BA is the process of transforming data into actionable insight by using statistical and mathematical analysis, descriptive, prescriptive and predictive models, machine learning, information systems and network science methods among others, along with a variety of data, expert knowledge and fact-based management to support better and faster decision making. BA and Business Intelligence (BI) generate capabilities for companies to compete in the market effectively and has become one of the main functional areas in most companies. BA tools are used in diverse ways, for example, to identify consumer behaviour patterns and market trends, to derive valuable insights on the performance of stocks, to find information on the attrition rate of employees, to analyse and solve healthcare problems, to offer insight into inventory management and supply chain management, to analyse data from social networks and to infer traffic behaviour and develop traffic management policy among others. BA and BI have become one of the most popular research areas in academic circles as well as in the industry, driven by the increasing demand in the business world. This book aims to become a stimulus for innovative business solutions covering a wide range of aspects of business analytics, such as management science, information technology, descriptive, prescriptive and predictive models, machine learning, network science, mathematical and statistical techniques. The book will encompass a valuable collection of chapters exploring and discussing computational frameworks, practices and applications of BA that can assist industries and relevant stakeholders in decision making and problem solving exercises with a view to driving competitive advantage. *Generative AI for Business Analytics and Strategic Decision Making in Service Industry*

Venaik, Anita, Chaturvedi, Vijit, Saproo, Sanjay, Bansal, Sanjeev, 2025-01-31 Generative AI is transforming industries by enhancing how businesses analyze data, generate content and automate complex processes. Its ability to produce diverse, high quality outputs in areas like marketing, customer engagement and software development is reshaping productivity and innovation. By leveraging advanced models such as GANs and Transformers, organizations can unlock new insights, streamline decision making and personalize services at scale. Generative AI also plays a crucial role in detecting errors, managing knowledge and mitigating harmful content, contributing to safer and more efficient digital environments. This technology not only accelerates growth but also democratizes access to powerful tools, fostering creativity and problem solving across sectors. *Generative AI for Business Analytics and Strategic Decision Making in Service Industry* provides a comprehensive exploration of how generative AI techniques can revolutionize business intelligence and data analytics practices. It offers a detailed examination of innovative algorithms, methodologies and tools for leveraging generative AI to extract actionable insights, drive innovation and enhance decision making processes within the service industry. Covering topics such as big data, generative adversarial networks (GANs) and productivity management, this book is an excellent resource for students.
