burning out and if you could just get your hands on it you'd finally stop trading hours for dollars. Then let Johnny Robinson and Sergio Silesky teach you Home Service Academy: The Million Dollar Remote Cleaning Blueprint. From the authors of Million Dollar Business Remote Cleaning Edition, Johnny Robinson and Sergio Silesky are the operators who turned a 150 startup into a combined 7M portfolio. Over five years, they launched 5 businesses, acquired 2, and exited 1, and every lesson in this book comes from the exact SOPs, hiring templates, ad funnels, and acquisition plays they used in the field. Everything about a repeatable manager-run cleaning business is covered, and none of it is theoretical. This is operator training disguised as a book. Why operations control is the new leverage. If there's one thing the best owners know, control the system and the system pays you. When your marketing converts predictably, your onboarding filters reliably, and your manager enforces quality, your business stops being a job and becomes an asset. This book teaches you how to build that control step by step so you can scale cashflow and exit. When you read Home Service Academy, you'll stop guessing and start executing. No more firefighting. No more guessing on ads. No more cleaning the jobs you sold. Who? Johnny Robinson and Sergio Silesky are short. Johnny builds the client acquisition funnels and sales systems that turn one-time jobs into recurring accounts. Sergio built the hiring, QA, and manager training frameworks that let owners be remote. Together, they packaged those systems into Home Service Academy, the hands-on blueprint for building and selling remote cleaning businesses. This book is for you if you want to own a manager-run cleaning company that actually scales. Replace yourself with a manager and win back time. Build recurring revenue that's predictable, not seasonal. Buy, integrate, or sell local service businesses with confidence. Use battle-tested SOPs, not theory, to protect margins and reduce churn. Inside, you will learn: How to build repeatable lead funnels that convert one-offs into recurring accounts; exact templates Johnny used; Hiring onboarding playbook; the Rule of 25; test scripts; interview templates; and the checklist that stops bad hires before they cost you money; Manager training scorecards; how to groom a manager who runs the business while you scale; Pricing; LTV; upsell frameworks that squeeze maximum profit from each client without losing the sale; Acquisition playbook; when to buy vs. build; valuation checks; deal structures; and real case studies from their 7M portfolio; Operational SOPs for quality assurance, scheduling, cancellations, and escalation so you can deliver consistent 5-star work every time; Ad funnels; cold outreach sequences; plug-and-play copy; budgets; and conversion math you can implement this week; Scaling checklist; how to open new territories; integrate teams; and make your brand repeatable across markets; Sellability; exit tactics; what buyers actually pay for; how to package metrics; and how to negotiate multiples. Real implementable templates, spreadsheets, scripts, and checklists you can copy into your business today. What to expect: the guarantee of a system, not a promise of overnight riches. This book does not sell you hope. It hands you operational leverage. The only variable it can't guarantee is execution, but follow the steps, use the templates, hire the right manager, and the playbook pays for itself. Why this matters now: Local services are still hyper-local, but the formula for scale is global. Predictable acquisition, repeatable delivery, remote management: a business that sells. Home Service Academy gives you the

exact mechanics for each piece from the first cold call to handing off the keys to a buyer If you re ready to stop trading hours for cash and start building a remote manager run business that actually sells this book is your blueprint Home Service Academy The Million Dollar Remote Cleaning Blueprint proven SOPs real case studies and the exact templates Johnny Robinson Sergio Silesky used to build a 7M portfolio Implement it Scale it Sell it Johnny Robinson co founded Orange Window Cleaning with 150 and turned hands on hustle into repeatable systems that power a multi company portfolio Over the past five years Johnny and his partner have launched more than five businesses acquired two completed one exit and grown their combined holdings to roughly 7M in annual revenue Johnny s expertise is client acquisition building predictable paid ad funnels cold outreach systems and sales scripts that convert one off jobs into recurring accounts He is the principal author of Million Dollar Business Remote Cleaning Edition and the public face of Home Service Academy s marketing and funnel strategies Johnny teaches operators how to stop trading hours for dollars to build systems that sell not just businesses that work His playbooks are practical battle tested and designed for immediate implementation by owners who want to scale fast without sacrificing margins Sergio Silesky is the operations brain behind Home Service Academy Raised in a large working class family and educated at Cal Poly Pomona Sergio turned early operational discipline into a documented system for hiring onboarding QA and manager training He architected the Rule of 25 the test clean process and pay models used across hundreds of cleaning crews all designed to reduce churn and stabilize margins Sergio specializes in systems that make businesses transferable documented SOPs manager scorecards and escalation frameworks that allow owners to be remote He co authored Million Dollar Business Remote Cleaning Edition and leads HSA s curriculum on operations manager development and acquisition integration Home Service Academy Remote Cleaning Remote Cleaning Academy manager run cleaning business Johnny Robinson Sergio Silesky Million Dollar Blueprint SOPs for cleaning business cleaning business acquisition

GigCX Terry Rybolt, Mark Hillary, Brian Pritchard, 2020-10-29 The global Covid 19 pandemic forced every customer service agent from their contact center into their home Work from home was proven to be a viable and secure operating model of customer service operations almost overnight But why did the contact centers continue with 8 hour shifts and team leaders tracking agents on web cams as if their agents were still commuting to an office GigCX applies the lessons of the gig economy Uber Airbnb etc to customer service Agents can earn more enjoy their job more and companies requiring customer service can pay less than if they outsourced to a specialist company In this book Brian Pritchard Terry Rybolt and Mark Hillary explore why GigCX is set to be the next big transformation of how brands deliver a fantastic customer experience GigCX offers greater transparency control efficiency and productivity why aren t you already exploring it for your business Why did we write this book together It s a good question because the gig economy has been

around for some time As Peter Ryan mentioned in the foreword management thinkers were talking about this back in the 90s Charles Handy even talked about the future of the portfolio career back in the 80s What's different now The truth is that many changes have taken place gradually leading to what might be called a perfect storm Companies like Uber and Airbnb demonstrated that platforms can change the world If you connect a service provider to a buyer of services in a flexible way that adds value then you can change an entire industry who is still stepping out into the street in the rain waving their arm for a taxi Cloud based services that are paid for as they are needed has also become an accepted standard for everything from computer software to language or piano tuition Paying for what you need and only paying for what you consume rather than an ongoing license has been normalized The Covid 19 pandemic proved that working from home could be safe secure and successful The major contact center companies had only tens of thousands of employees based at home in 2019 This is in an industry that employs millions of customer service agents globally After Covid those companies had to make it work and the success stories have become almost tiring to read because of their frequency another company proves that it's possible to deliver with agents based at home But it's very different to design a solution that expects people to be based from home rather than an emergency response to a pandemic If you are designing a flexible home based service solution then you can widen the net and search for people anywhere This means you can hire people who value flexibility They want to work from home they have not been forced into this They want to work from home because they are more entrepreneurial and excited by their work They want to work flexible hours They want to work only with brands they like so you can search for fans of the companies you are supporting This combination of the cloud platforms and the evolution of work from home operating models means that all the stars are now aligned for GigCX to flourish In GigCX Customer Service In The Twenty First Century you can learn about what is changing how customer service is evolving and how your business can explore these new flexible opportunities www.livexchange.com GigCX
