Generative AI in Education Ilaria Torre, Diego Zapata-Rivera, Chien-Sing Lee, Antonio Sarasa-Cabezuelo, Ioana Ghergulescu, Paul Libbrecht, 2024-12-24 In the field of education there is a growing interest in the use of Generative Artificial Intelligence to reshape the educational landscape Led by our esteemed Associate Editors Dr Zapata Rivera Prof Torre and Review Editors Profs Lee Sarasa Cabezuelo Libbrecht Dr Ghergulescu this editorial initiative aims to investigate the transformative potential of Generative AI in various aspects of education By leveraging machine learning models these intelligent systems extract useful insights from vast amounts of data making them capable of delivering highly individualized content They can analyze a learner s proficiency level learning style and pace and then tailor the study material accordingly Whether a learner prefers visual aids textual content or interactive modules Generative AI can adapt its content generation strategies to meet distinct preferences and learners needs This ensures an elevated engagement level and enhanced comprehension highlighting its potential to transform traditional teaching methodologies

Bridging the Gap Between AI and Reality Bernhard Steffen, 2024-10-30 This open access book constitutes revised selected papers from the First International Conference on Bridging the Gap between AI and Reality AISoLA 2023 which took place in Crete Greece in October 2023 The papers included in this book focus on the following topics The nature of AI based systems ethical economic and legal implications of AI systems in practice ways to make controlled use of AI via the various kinds of formal methods based validation techniques dedicated applications scenarios which may allow certain levels of assistance and education in times of deep learning

Invocational Media Chris Chesher, 2023-10-19 Invocational Media critiques the sociotechnical power of digital technologies by introducing the concept of invocational media What is an invocation Ask your voice assistant and it will define it for you It is a media artefact that responds to many invocations such as seeking the weather forecast requesting any song you can name or turning on the lights almost magically This contemporary manifestation of the ancient practice of invocation gives an immediate response to your call in a way that Chris Chesher argues is the characteristic power of all computers which he redefines as invocational media This book challenges the foundations of computer science by offering invocation as a powerful new way of conceptualising digital technologies Drawing on media philosophy Deleuze Guattari Heidegger Latour Austin Innis and McLuhan it critiques the representationalism of data processing artificial intelligence and virtual reality Invocational media seem to empower individuals but necessarily subject users to corporate and government monopolies of invocation They offer many solutions

but only by reducing everything to the same kind of act They complicate agency in their indifference as to whether invokers are human or non human With robotics they invoke material form to act physically and autonomously People willingly make themselves invocable to surveillance and control by creating their own profiles and marking themselves with biometrics This ground breaking book will change how you think about digital media by showing they are in fact invocational media

Legal Knowledge and Information Systems Jerry Spanakis,Gijs van Dijck,2023-12-15 Technological advances related to legal information knowledge representation engineering and processing have aroused growing interest within the research community and the legal industry in recent years These advances relate to areas such as computational and formal models of legal reasoning legal data analytics legal information retrieval the application of machine learning techniques to different legal tasks and the experimental evaluation of these systems This book presents the proceedings of JURIX 2023 the 36th International Conference on Legal Knowledge and Information Systems held from 18 20 December 2023 in Maastricht the Netherlands This annual conference has become recognized as an international forum where academics and professionals working at the intersection of law and artificial intelligence can exchange knowledge and experience A total of 92 submissions were received for the conference of which 18 were selected as long papers 30 as short papers and 7 as demo papers following a rigorous review process This represents an acceptance rate of around 20% for long papers 60% overall Topics covered include formal approaches applied to various aspects of legal reasoning machine learning and information retrieval methods applied to various natural language processing tasks hybrid approaches to working on the frontier between symbolic and sub symbolic methods experimental inquiries into the interfaces between computational systems and legal systems and network analysis in law Providing a comprehensive overview of recent advances in the field the book will be of interest to all those working at the intersection between law and AI
