Jérémie Bouchard looks at the GenAI language education interaction through explicit philosophical engagement with the aim of strengthening a critical and emancipatory approach to EAP written composition and language education. By highlighting technological determinism and relating it to broader neoliberalist mechanisms, the book provides new insights into the social, political, economic, cultural and historical contexts within which the use of GenAI technologies by language teachers and learners can be understood. *Humanising Language Education in the Generative Artificial Intelligence Age* will appeal to students and scholars of linguistics, education and sociology as well as organisations devoted to understanding the evolution, application and impact of GenAI on education and language learning. "Free AI Tools for Teachers 2025" Deepak D., 2025-09-18 Teaching has always been about balance: balancing lessons, grading, parent communication and the unique needs of every student. However, in 2025, maintaining that balance is more challenging than ever. Teachers are stretched thin, and the demands of modern classrooms can feel overwhelming. That's where artificial intelligence (AI) comes in. But let me be clear: this book isn't about replacing teachers with robots or adding more technology headaches to your plate. It's about introducing you to free, easy-to-use AI tools that can reduce your workload, spark creativity, and free up time for what matters: connecting with your students. When I started researching AI in education, I was amazed by how many powerful tools were available at no cost. Teachers were using them to draft lesson plans in minutes, generate practice quizzes, provide personalised feedback, and even keep their classrooms more organised. The more I explored, the clearer it became: every teacher deserves access to these tools, and most importantly, guidance on how to use them effectively.
