Transformative Education. Charlotte Graham, Philippe Longchamps, 2022-08-03. Transformative Education aims decisively to transform the world of education and to nurture the next generation to become problem solvers and creative thinkers empowered with the necessary skills to make this world a better place. It provides practical methods for sustainable integrative and active learning and investigates the why behind these proven and effective methods. Discussing the different levels of subject integration in school from intradisciplinary to transdisciplinary teaching, the authors analyse their potential holistic impact and knowledge retention effectiveness. With a substantial section on the efficacious teaching of the increasingly indispensable field of critical thinking, this book is built up first around a discourse of the intended methodology; secondly, it also includes a very practical mid-section with direct and meticulously described project ideas for teachers to try out; and finally, a discussion and an analysis on what effects the proposed techniques might have and how teachers and students could be facilitated in their learning processes by school leaders and administrators. This pioneering endeavour is an important text for education professionals globally as well as for the policy makers that regulate their work. It may also be of interest to parents and to a wider society. Additional digital resource content is available online and includes practical examples, explanations, and video to help support sustainable integrative and active learning.

"Free AI Tools for Teachers 2025" Deepak D, 2025-09-18. Teaching has always been about balance: balancing lessons, grading, parent communication, and the unique needs of every student. However, in 2025, maintaining that balance is more challenging than ever. Teachers are stretched thin, and the demands of modern classrooms can feel overwhelming. That's where artificial intelligence (AI) comes in. But let me be clear: this book isn't about replacing teachers with robots or adding more technology headaches to your plate. It's about introducing you to free, easy-to-use AI tools that can reduce your workload, spark creativity, and free up time for what matters: connecting with your students. When I

started researching AI in education I was amazed by how many powerful tools were available at no cost Teachers were using them to draft lesson plans in minutes generate practice quizzes provide personalised feedback and even keep their classrooms more organised The more I explored the clearer it became every teacher deserves access to these tools and most importantly guidance on how to use them effectively [Catalog of Copyright Entries.
