Companion Dr. Eleanor Vance, 2025-08-26 It begins with a moment that is becoming all too familiar: a parent discovers their child's perfect essay was, in fact, written with the help of AI. That moment isn't a crisis; it's the crossroads millions of parents now face. Our children have a new classmate, a tutor, and a tool of unimaginable power: Artificial Intelligence. And none of us were ever given the instruction manual. Enter Dr. Eleanor Vance. With over two decades of experience at the intersection of child development and educational technology, Dr. Vance is a researcher, an educator, and above all, a parent who understands the mix of awe and anxiety that defines modern parenting. The AI Companion is not a book about building higher walls or banning technology. It is a guide to empower you, the parent, to step out of the shadows of fear and confusion and into the light of confidence and guidance. In this book, you will embark on a three-part journey. Part One: Understanding the New World. Demystify what AI truly is and how it's fundamentally changing the landscape of education, friendship, and learning. Part Two: The Modern Parent's Toolkit. Get hands-on protocols, actionable advice, and conversation scripts for everything from setting healthy boundaries for a seven-year-old to discussing academic integrity with a teenager. Part Three: Preparing for a Centaur Future. Learn how to cultivate the uniquely human skills: critical thinking, emotional intelligence, and creativity that will ensure your child doesn't just compete with AI but thrives alongside it. This book is your promise to transform from an anxious spectator into an informed, empowered co-pilot, ready to guide your child on their journey into the future. **Robotics Made Easy for Kids** Oren Talbot, 2025-11-29 Unlock the Future of Technology with the Ultimate Guide to Robotics for Young Inventors.
