AI Meets BI Lakshman Bulusu, Rosendo Abellera, 2020-11-03 With the emergence of Artificial Intelligence AI in the business world a new era of Business Intelligence BI has been ushered in to create real world business solutions using analytics BI developers and practitioners now have tools and technologies to create systems and solutions to guide effective decision making Decisions can be made on the basis of more reliable and accurate information and intelligence which can lead to valuable actionable insights for business Previously BI professionals were stymied by bad or incomplete data poorly architected solutions or even just outright incapable systems or resources With the advent of AI BI has new possibilities for effectiveness This is a long awaited phase for practitioners and developers and moreover for executives and leaders relying on knowledgeable and intelligent decision making for their organizations Beginning with an outline of the traditional methods for implementing BI in the enterprise and how BI has evolved into using self service analytics data discovery and most recently AI AI Meets BI first lays out the three typical architectures of the first second and third generations of BI It then takes an in depth look at various types of analytics and highlights how each of these can be implemented using AI enabled algorithms and deep learning models The crux of the book is four industry use cases They describe how an enterprise can access assess and perform analytics on data by way of discovering data defining key metrics that enable the same defining governance rules and activating metadata for AI ML recommendations Explaining the implementation specifics of each of these four use cases by way of using various AI enabled machine learning and deep learning algorithms this book provides complete code for each of the implementations along with the output of the code supplemented by visuals that aid in BI enabled decision making Concluding with a brief discussion of the cognitive computing aspects of AI the book looks at future trends including augmented analytics automated and autonomous BI and security and governance of AI powered BI

Gordon Allen's Provender Gordon Allen, 2015-06-19 July 3rd 2013 Are we alone in this vast universe Jake and Steven McClain had problems of their own to even consider that question not even when the answer was an undeniable no and staring them both in the face Neither McClain knew of the others existence Both faced disastrous consequences if they chose the wrong path back from hell Jake and Steven McClain had more in common than their last names or saving their respective Clans from total and complete annihilation Steven was born on a planet named Provender a world literally created by the Torill a flesh eating race from another Galaxy His descendants were brought to Provender by

the Torill to proliferate and multiply into enough live flesh to sustain the Torill when they returned 200 years later to again take on the once mighty Froellian peace keepers of the Milky Way The Torill were not the immediate problem saving his Clan from those on Provender who had declared they would defeat and then annihilate Steven and his once mighty Blackwatch Clan was Jakes home world is Earth hed lived a sheltered life for most of his 25 years that is until he discovered that Earth was going to be struck by not one but two asteroids that could easily destroy the human race What ifs are explored in Provender such as what if we are not alone or what if Earth is struck by an asteroid and What if two humans with drive and determination and who share the same ancestors find each other What then Are humans capable or even worthy of existing at all in the Milky Way Galaxy Can a fledgling species just beginning its move into space unite the people of other worlds in time to stop the annihilation of an entire Galaxy by a superior force empowered by vengeance and a historical need to eat living sentient flesh Follow Steven and Jake McClain as they discover that the Universe does not revolve around their respective worlds That there are many sentient civilized worlds that discovered that fact long before sentient life walked on Earth
