Current Topics in Children's Learning and Cognition Heidi Kloos, Bradley Morris, Joseph Amaral, 2012-11-14 As a whole the essays in this book address theoretical and empirical issues related to children s learning and cognition The first essay titled Learning in Cognitive Niches treats the process of sense making on a theoretical level discussing the complexity of factors that give rise to children s learning It is followed by an essay titled Using the Dynamics of a Person Context System to Describe Children s Understanding of Air Pressure that applies ideas from complexity science and dynamics systems theory to children s learning about science The next four essays summarize and synthesize already published findings in an effort to go beyond individual viewpoints and present a more nuanced picture of children s sense making In particular two of these summaries Preschoolers Learning Science Myth or Reality and The Emergence of Scientific Reasoning focus on children s ability to make sense of their physical environment The essay Cognition and the Child Witness Understanding the Impact of Cognitive Development in Forensic Contexts seeks to shed light on children s sense making relevant to forensic issues And the essay Beyond the Black and White of Autism How

Cognitive Performance Varies with Context ventures in the area of autism a disorder that demonstrates atypical processes of combining pieces of information The final two essays provide original data to add to the discussion of what factors affect cognitive functioning In particular the essay Cognitive Fitness in Young Adult Video Game Players seeks to re assess the often assumed relation between video gaming and various aspects of thinking memory intelligence and visual spatial abilities And the essay Impact of Moving Away from Home on Undergraduate Metacognitive Development explicitly connects life circumstances to the ability to monitor and control one s thinking Together the collection of essays are a further step towards understanding the process of sense making as children and young adults interact with their environment **Doing what**

Scientists Do Ellen Doris,1991 Teachers and administrators wanting to make elementary science programs work will find out how in these pages This book translates the theory of discovery science into a method that teachers can use It shows how to begin and how to keep going how to organize space and materials how to manage the classroom in a way that encourages focus and interest how to inspire curiosity and help satisfy it Rich with examples of children s work and classroom dialogue this is a practical book meant to help teachers implement its ideas **New Ground** Karen S. Sullenger,R. Steven

Turner,2015-05-07 Between 2004 and 2009 university educators practicing scientists museum and science centre personnel historians and K 12 teachers in Canada s eastern Atlantic provinces came together as a research community to investigate informal learning in science technology and mathematics The interdisciplinary collaboration known as CRYSTAL Atlantique was sponsored by Canada s National Science and Engineering Research Council In this volume the CRYSTAL participants look back on their collective experience and describe research projects that pushed the boundaries of informal teaching and learning Those projects include encounters between students and practicing scientists in university laboratories and field studies summer camps for science engagement after school science clubs for teachers and students innovative software for computer assisted learning environmental problem solving in a comparative international context online communities devoted to solving mathematical problems and explorations of ethnomathematics among Canadian aboriginal peoples The editors and contributors stress the need for research on informal learning to be informed continuously by a notion of science as culture and they analyze the forms of resistance that studies of informal learning frequently encounter Above all they urge a more central place for informal science learning in the larger agenda of educational research today **ENC Focus** ,1997

Teacher Research Deborah Roberts,Claire Bove,2007 If you re a science teacher this collection will show you paths that others have found to deepen their understanding of the philosophy and practice of teacher research If you re a science teacher educator it will give you examples about the many ways in service teachers can conduct inquiry Either way Teacher Research provides a memorable passage into learning and growing Monitoring Understanding in Elementary Hands-on

The Having of Wonderful Ideas" and Other Essays on Teaching and Learning Eleanor Duckworth, 2006-11-24 Duckworth's ideas contained in these timeless essays are more important than ever to the public discourse on education They are a much needed antidote to many of today's school reform practices where a number is accepted as an adequate representation of a student's learning This revised edition features a new Introduction and a new chapter on critical exploration in the classroom

Interdisciplinary Inquiry in Teaching and Learning Marian L. Martinello, Gillian Elizabeth Cook, 2000 For a graduate course in Elementary or Middle School Methods or as a supplement in these courses Unique to this market this book's philosophical and theoretical premises value interdisciplinary themes as vehicles for inquiry learning by students in upper elementary grades It defines inquiry learning as a means for teachers and students to develop study topics into themes formulate questions about the thematic content find and engage various resources to explore questions and take big ideas from their findings The authors suggest ways that current and future teachers can apply the text's instructional ideas to discover their own personal styles of thematic curriculum development through interdisciplinary inquiry

Building the Primary Classroom Toni S. Bickart, Judy R. Jablon, Diane Trister Dodge, 1999 Building the Primary Classroom puts the best elements of classroom management and curriculum content together in one concise volume

The Young Child as Scientist Christine Chaillé, Lory Britain, 1997 Young children how they experience the world interact with each other pose questions and problems and construct knowledge form the basis for this insightful examination of early childhood science education Authors Chaille and Britain explore the teacher's role in understanding and facilitating preschool and primary school children's scientific explorations Using three traditional content areas of science chemistry physics and biology and translating them into developmentally appropriate practices *The Young Child as Scientist* leaves behind rigid views of science education Both teachers and students of early childhood education are led to reconceptualize science in ways that have implications for their whole classroom Without being a cookbook approach

to curriculum planning or a purely theoretical approach the text weaves practical examples and theory together to present constructivism as it can be implemented in real preschool and elementary classrooms

Play at the Center of the Curriculum Judith Lieberman Van Hoorn, 2003 This is the third edition of the book that takes to heart the adage Play is children's work Believing that play is a primary factor in the development of intelligence personality competencies self awareness and social awareness the authors demonstrate how to draw from spontaneous play both the methods and the content of a successful curriculum for children from birth to age eight The book introduces the theories of Piaget Vygotsky Erikson Mead and many contemporary researchers explores the traditional curriculum arenas of early childhood education and includes discussion of the role of work adult models and authority in children's play For teachers specializing in Early Childhood Education pre school teachers day care personnel parents and anyone with an interest and involvement in the education development and care of young children
