TV you may have noticed a lot of dumb ideas floating around We know when history will repeat and when it won't We can tell the difference between evidence and coincidences The simplest explanation is usually true Wrong wrong and dangerous If we're not careful loserthink would have us believe that every Trump supporter is a bigoted racist addicts should be responsible for fixing the opioid epidemic and that your relationship fell apart simply because you chewed with your mouth open Even the smartest people can slip into loserthink's seductive grasp This book will teach you how to spot and avoid it and will give you scripts to respond when hollow arguments are being brandished against you whether by well intentioned friends strangers on the internet or political pundits You'll also learn how to spot the underlying causes of loserthink like the inability to get ego out of your decisions thinking with words instead of reasons failing to imagine alternative explanations and making too much of coincidences Your bubble of reality doesn't have to be a prison This book will show you how to break free and what's more to be among the most perceptive and respected thinkers in every conversation **Too Weird to Believe, Too**

Plausible to Deny Cliff Sosis, 2025-10-15 Anyone new to philosophy soon encounters new ideas that challenge their hidden biases and cherished beliefs or are at odds with common sense and tradition Yet these philosophical ideas are backed by strong arguments arguments so strong that it's difficult to identify what is wrong with them Too Weird to Believe Too Plausible to Deny Mind Blowing Philosophical Ideas explores these strange yet cogent ideas in 29 short clear chapters written by some of the best philosophers alive today Some of these ideas include Nobody should reproduce You are not responsible for your actions Consciousness is in everything everywhere Your property doesn't really belong to you Absolutely anything can be art Biases are morally good and help us understand reality We can't know what scientific facts are correct Having a disability can be good for you You should never ever lie even to save a life You have no moral duty to obey the law You don't exist because there is no self Each chapter starts with a seemingly counterintuitive philosophical conclusion and a simple accurate description of the underlying argument supporting the conclusion including historical and cultural context This is followed by an outline of objections for the purposes of conversation and debate and a discussion of the implications of the idea or how it may relate to the reader's interests and attitudes Each chapter closes with suggested readings and a list of references for readers who want to learn more about the idea *Strategic Planning for Public Relations* Ronald D.
