Triandafyllidou,2016-05-06 With specific attention to irregular migrant workers that is to say those without legal permits to stay in the countries in which they work this volume focuses on domestic work presenting studies from ten European countries including Belgium France Germany Greece Ireland Italy the Netherlands and Spain Offering a comparative analysis of irregular migrants engaged in all kinds of domestic work the authors explore questions relating to employment conditions health issues and the family lives of migrants The book examines the living and working conditions of irregular migrant domestic workers their relations with employers their access to basic rights such as sick leave sick pay and holiday pay as well as access to health services Close consideration is also given to the challenges for family life presented by workers status as irregular migrants with regard to their lives both in their countries of origin and with their employers Through analyses of the often blurred distinction between legality and illegality the notion of a career in domestic work and the policy responses of European nations to the growth of irregular migrant domestic work this volume offers various conceptual developments in the study of migration and domestic work As such it will appeal to sociologists political scientists geographers and anthropologists with interests in migration gender the family and domestic work **Migrants at Work**

Cathryn Costello,Mark Freedland,2014-10-30 There is a highly significant and under considered intersection and interaction between migration law and labour law Labour lawyers have tended to regard migration law as generally speaking outside their purview and migration lawyers have somewhat similarly tended to neglect labour law The culmination of a collaborative project on Migrants at Work funded by the John Fell Fund the Society of Legal Scholars and the Research Centre at St John s College Oxford this volume brings together distinguished legal and migration scholars to examine the impact of migration law on labour rights and how the regulation of migration increasingly impacts upon employment and labour relations Examining and clarifying the interactions between migration migration law and labour law contributors to the volume identify the many ways that migration law as currently designed divides the objectives of labour law privileging concerns about the labour supply and demand over worker protective concerns In addition migration law creates particular forms of status which affect employment relations thereby dividing the subjects of labour law Chapters cover the labour laws of the UK Australia Ireland Israel Italy Germany Sweden and the US References are also made to discrete practices in Brazil France Greece New Zealand Mexico Poland and South Africa These countries all host migrants and have developed systems of migration law reflecting very different trajectories Some are traditional countries of immigration and settlement migration

while others have traditionally been countries of emigration but now import many workers There are nonetheless common features in their immigration law which have a profound impact on labour law for instance in their shared contemporary shift to using temporary labour migration programmes Further chapters examine EU and international law on migration labour rights human rights and human trafficking and smuggling developing cross jurisdictional and multi level perspectives Written by leading scholars of labour law migration law and migration studies this book provides a diverse and multidisciplinary approach to this field of legal interaction of interest to academics policymakers legal practitioners trade unions and migrants groups alike

Domestic Workers of the World Unite! Jennifer N. Fish, 2017-07-25 Look deep in your hearts making a global domestic workers movement Dignity overdue tracing a movement Getting on the map global policy as an activist stage First to work last to sleep central policy debates My mother was a kitchen girl mobilizing strategies among domestic workers Put yourself in her shoes NGO union and feminist allies A little bit of liberation moving beyond rights

Union Maids Not Wanted D L Van Raaphorst, 1988-05-12 Housework and domestic service have become popular topics within the scholarly community Van Raaphorst adds to this growing literature by illuminating the efforts to organize domestics in the years from the Civil War to WWII The book does much more than this however It surveys the period from early colonization to the 1930s and divides the history of domestic service into four distinct chronological eras The author examines the psychology of housework and assesses the occupation from the perspectives of the employer and employee Finally she sketches the seemingly innumerable but inevitably fleeting attempts to better the lot of the domestic either through organization or unionization Choice Union Maids Not Wanted offers a comprehensive investigation of why the most populous group of the female workforce domestic workers was unable to establish long lasting powerful unions as have other groups of laborers The author chronicles the number of colorful yet failed attempts at organization throughout the period of 1870 1940 analyzing the factors which worked together to prevent successful unionization She systematically examines the psychology and nature of domestic work union rejection of domestic laborers employers opposition to organization and the frequent disagreements among the domestics themselves Finally she demonstrates how these factors affected the orientation of domestic workers to the organized labor movement as a whole and as a force within their own ranks

restrictions if any should be placed on the right to strike Engagingly written this innovative new textbook provides an entry point for exploring these and other topical issues enabling students to analyse the applicability of human rights to disputes between employers and workers in the UK It offers an original perspective on the traditional topics of employment law as well as looking in greater depth at new issues such as employees use of social media or the enforcement of human rights in the gig economy Uniquely the book considers the most important international Conventions that are relevant for the law in the UK especially the European Convention on Human Rights the European Social Charter Conventions of the International Labour Organisation and the Charter of Fundamental Rights of the European Union A central question that each of the chapters addresses is whether UK employment law is compatible with human rights law Each chapter discusses all the key cases drawn from various jurisdictions including the Court of Justice of the European Union and the European Court of Human Rights Written by a stellar team of authors this textbook is an invaluable teaching aid for both postgraduate and undergraduate students studying employment law human rights human resource management and industrial relations

Doing the Dirty Work? Bridget Anderson, 2000-02 There has been a tendency amongst feminists to see domestic work as the great leveller a common burden imposed on all women equally by patriarchy This unique study of migrant domestic workers in the North uncovers some uncomfortable facts about the race and class aspects of domestic oppression Based on original research it looks at the racialisation of paid domestic labour in the North a phenomenon which challenges feminism and political theory at a fundamental level The book opens with an exploration of the public private divide and an overview of the debates on women and power The author goes on to provide a map of employment patterns of migrant women in domestic work in the North she describes the work they perform their living and working conditions and their employment relations A chapter on the US explores the connections between slavery and contemporary domestic service while a section on commodification examines the extent to which migrant domestic workers are not selling their labour but their whole personhood The book also looks at the role of the Other in managing dirt death and pollution and the effects of the feminisation of the labour market as middle class white women have greater presence in the public sphere they are more likely to push responsibility for domestic work onto other women In its depiction of the treatment of women from the South by women in the North the book asks some difficult questions about the common bond of womanhood Packed with information on the numbers of migrant women working as domestics the racism immigration or employment legislation that constrains their lives and testimonies from the workers themselves this is the most comprehensive study of migrant domestic workers available
