Workforce shortage in a digital era. Can 100% remote work attract more qualified candidates? Huong Hoang Thien, 2023-05-25 Master s Thesis from the year 2023 in the subject Leadership and Human Resources Recruiting grade 1 0 language English abstract What will happen if there aren t enough talents to fill the market in the future due to the demographical change This study focuses on the potential of offering 100% remote work to counteract the workforce shortage in Germany An empirical study has been conducted as an online survey to gain an overview of Germany s 100% remote job market In a fast changing world digital transformation has become an evitable process for companies to adapt to new technologies and market trends The digital transformation in Germany has been significantly impacted by the COVID 19 pandemic positively and negatively On the one hand the pandemic forced German companies to embrace new technology more quickly and adapt to remote work However

on the other hand it pointed out Germany's weaknesses in digital infrastructures and cybersecurity. Additionally, many German companies face a shortage of workers due to digital transformation. Another reason that causes workforce shortage is demographical change. Companies cannot operate their business correctly, increase revenue or drive innovations to survive in a competitive market without suitable candidates. Furthermore, the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences. Therefore, companies must know them and their work preferences to fill the workforce shortage gap. Remote working as a sub trend of the mega trend New Work has become the new standard for workers especially since the pandemic. However, there aren't any specific regulations regarding remote work in Germany yet. In general, remote work provides workers e.g. more freedom and a better work-life balance. Nevertheless, remote work also has the downside such as workers experiencing isolation and loneliness due to the lack of social contact with co-workers, less productivity outside of the office etc. For companies, offering remote work gives them complete access to the talent pools, including freelancers as external workers, reducing costs due to fewer offices being more attractive to job seekers. But on the other side, remote leadership has become a big challenge for leaders. Furthermore, companies have to deal more with cyber security. When everything's going remotely, companies have become an easier target of cyber attacks.

Re-envisioning Organizations through Transformational Change Poornima Madan, Shruti Tripathi, Fehmina Khalique, Geetika Puri, 2022-12-28. The journey towards the future of work was greatly accelerated due to the COVID pandemic. Some changes have altered the functioning of the business world forever. Against the backdrop of these alterations, variations and modifications, this book presents and analyzes three crucial factors: work, workforce, and workplace, and their transformation into new age organizations for meeting its customer expectations and long-term strategic goals. Companies must focus on ways of deployment of policies and practices that meet the business needs from the perspective of external changes. To achieve this goal, the organizations must realign their stakeholders and indulge in critical thinking by looking deeply into factors responsible for bringing about this transformational change. Re-envisioning is the current critical need for organizations to thrive; they must incorporate best practices to beat the competition and add value to their existing HR processes. This book clearly presents the practices and policies of successful organizations through the contribution of industry leaders. This book helps you understand the dynamism of work, workforce, and workplace that exist in organizations as well as the challenges these organizations face and their impact on business practices. The authors cover these broad areas because of the need to diversify and promote organic inclusive growth. Essentially, re-envisioning our organizations is the new normal. Organizations must leave the shackles of what might have been and look to what they can be. Stakeholders, employees, and the environment have been drastically altered, and organizations must change accordingly to survive. What now matters is how much an organization re-envisioning itself and how it deals with all that is happening.
